Nothing Much About Nothing

That noise you hear at certain
wicked ungodly hours is the factory
whistle.

The editor and Hiram Kimball
are contemplating taking the roles
of Thomas Meighan and Douglas
Fairbanks, respectively, at the
made-in-Raymond movie at the
Rex next Wednesday evening. It
will be worth the money.

If the advertising contained in
this issue were a regular thing
this town would sport a daily.
Note that we are forced to sup-
plement the "old rag", as our
friends refer to us.

Lou King says it may be true
that the early bird gets the worm,
but who wants worms?

Hamp Witbeck can tell you
what weather conditions were at
any time of day or night. "He
Never Sleeps." He and his old
Covered Wagon meet all three
factory shifts coming and going.
Wot a life!

The day after Byron Wall fin-
ished threshing two 50-acre fields
of wheat (averaging 45 and 69
bushels per acre,—5700 bushels of
No. 3 Marquis) the Rolls Royce
salesman appeared in town. But
Byron is waiting to see what the
new Ford looks like, and, judging
by the luck he has already had
this year, he will most likely win
the 50 gallons of gas at King
Motors. The ad. is in the supple-
ment.

The wordy combats between G.
W. Green and Mayor Hardy of
Lethbridge, as reported by the
press, are worthy of the end men
in a minstrel show. Albertans
should feel grateful to these two
for the merriment they create.

The surprising thing about the
Convention at Winnipeg this week
is that the names of Will Redd
and Dr. Heal were scarcely men-
tioned.

When you serve RED ROSE ORANGE PEKOE to your family you are giving them the best tea you can buy.

The Conference Of Premiers

At the invitation of the Dominion Government there will assemble at Ottawa early in November a conference of representatives of the Federal Government and of all the Provincial Governments at which consideration will be given to the many questions affecting the interests and rights of the Dominion and its several provinces. This conference will be attended by the Dominion Prime Minister and some of his colleagues and by all nine Provincial Premiers who in each case will be accompanied by cabinet colleagues.

The object of this round table conference is, of course, to discuss problems common to all and endeavor to find satisfactory solutions, to adjust any differences now existing, to try and harmonize conflicting laws, eliminate overlapping in administration, and, in general, to study the financial requirements of the several governmental units. In a word, it is co-operation for the good of all Canada. Its importance, therefore, does not call for any special emphasis.

This conference of Canadian Premiers is designed to accomplish for Canada something similar to what the recent Imperial Conference at London accomplished for the Empire as a whole. For example, the exact status of the Dominion and its several Provinces in regard to certain subjects requires to be clarified. There is now conflict of authority in matters of Company law, incorporation and regulation, including licensing of companies. In insurance matters particularly there is more or less confusion.

Again, most of the Provinces are anxious to exercise strict supervision and control over the sale of stocks and bonds of companies, and several Provincial Legislatures enacted what are termed "blue sky" laws for the protection of the investing public, only to find that all companies had to do to escape Provincial jurisdiction was to become incorporated under Dominion law. The Provinces desire Federal action to overcome this difficulty.

Another matter which is causing adverse comment throughout the country is the duplication of police forces, with consequent division of authority, sometimes leading to overlapping and consequent friction; sometimes resulting in lack of co-operation. In any event, people feel there is an unnecessary waste of the taxpayers' money with Dominion, Provincial and Municipal police. The Premiers' Conference will give consideration to such problems as these.

Then there is the ever-recurring question of the Dominion subsidies paid to the Provinces, and the complications resulting from the fact that some Provinces have control of their natural resources while others have not. As an outcome of the Duncan Report, the Maritime Provinces have been given a new financial arrangement temporarily. To this the other Provinces have not raised any objection, but if a new and permanent arrangement is to be made in the interests of these Provinces, then all the Provinces have a vital interest in the matter.

Furthermore, it is now fairly well recognized that the financial terms originally fixed at the time of Confederation, and as altered from time to time, work out to the advantage of the Dominion and unfairly to the Provinces. That is to say, increased population brings largely increased revenues to the Dominion through Customs, Excise, and other forms of taxation, but to the Provinces increased population means enormously increased expenditures for education, roads, hospitals, court houses, and institutions of various kinds, while the small increase in the subsidies received from Ottawa because of such larger population is a mere bagatelle compared with such expenditures. Re-adjustment of the financial terms, therefore, becomes a necessity from time to time.

No one thing is more apt to weaken Confederation than the existence of a feeling that it is not working out quite fairly to the Provinces, or that, in regard to those matters which are subject to both Dominion and Provincial jurisdiction, Federal Departments are not displaying that spirit of helpful co-operation which is essential to complete efficiency in Provincial administration. On the other hand, real unity in effort, frank recognition and understanding of each other's problems, and sympathetic consideration and action will make the Dominion united and strong.

The people of Canada will entertain high hopes that the Ottawa Conference will be as successful in its field as the Imperial Conference was in the larger arena of Empire affairs.

Aviation in Canada
No country provides a better field for air communication than Canada. The distances between the cities are great and the climate is favorable for flying. Experience shows that with suitable equipment, winter presents no insuperable obstacle to the continuous operation of air routes.

Approximately 80 per cent. of the automobiles sold in the United States last year were bought on the deferred payment plan.

Good Country For Aviation

No country provides a better field for air communication than Canada. The distances between the cities are not great and the climate is favorable for flying. Experience shows that with suitable equipment, winter presents no insuperable obstacle to the continuous operation of air routes.

The youngest president of the United States was Theodore Roosevelt, who was inaugurated at the age of 42.

Penetrates Far North

University Graduate Prepares For Expedition Into Arctic Circle

Paddling 1,300 miles alone through the regions of Northwest Canada with only Indians, Hudson's Bay Company trappers, and herds of animals to punctuate the monotony, Cornelius Osgood, 21-year-old graduate student in anthropology at the University of Chicago, spent the summer steeping himself in the lore of the North woods and learning to live the life of the Indians, preparing himself for a 14-months expedition next year into the Arctic Circle to report on the culture of the little-known Athabasca Indians. Osgood has just returned to the university to continue his studies in ethnology.

One Drop of "Putnam's" —Corns Stop Aching

Isn't it wonderful — Just a drop or two of Putnam's on any sore corn and out comes all the pain. After a few applications the corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes anymore. You can dance or walk in comfort. Be sure you use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere. Refuse a substitute for Putnam's—It's the best.

Will Bar Italians

Fascist Oath Will Bar Aliens From U.S. Citizenship

Secretary of Labor Davis has reiterated his statement that acceptance of the Fascist oath, as explained to his office, should bar an alien from citizenship in the United States.

"If the Fascist oath requires double allegiance, in my opinion the man or woman who takes it will not make a good American citizen," the secretary declared.

The question of eligibility of a member of the Italian Fascist to American citizenship came up in Baltimore, where J. R. Thomas, naturalization examiner, is reported as suspending action on 23 Italians, pending investigation of the so-called "blood" oath.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers, and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

America's Oldest Shoemaker

The oldest shoemaker still at the last in the United States is believed to be Daniel Sligerland, of Pompton Lakes, New Jersey, who has just celebrated his 84th birthday. Sligerland entered his father's shoe repair shop when he was 13 years old. He inherited the business, and it is calculated that he has handled 101,650 pairs of shoes.

Externally or Internally, It is Good.
When applied externally by brisk rubbing, Dr. Thomas' Eucalypti Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Antarctic Expedition

Expedition To Extreme Southern Seas Returns To England

After two years of scientific research in the extreme southern seas, Captain Robert F. Scott's old Antarctic ship, Discovery, returned to Falmouth, England, having suffered no casualties in the struggles with the ice fields.

The expedition gathered valuable information, especially about the life habits of whale. Dr. Stanley Kemp, the leading scientist aboard, told newspapermen that on the disputed marital habit of whales, they are not monogamous. On the contrary, he declared, they have, so to speak, "a wife in every port."

The heaviest wood is lignum-vitae, which runs from 73 to 82 pounds a cubic foot. Ebony is a close second, with from 69 to 83 pounds; boxwood is third, running from 59 to 72 pounds a cubic foot.

Isolate Germ Of Infantile Paralysis

Task Of Science Is Simplified In Attempt To Cope With Disease

A special despatch to the Morning World from Boston, Mass., New-York, says:

"The germ of infantile paralysis has been definitely classified, thereby simplifying the task of science in its attempts to overcome the disease," Dr. W. L. Aycock, head of the Harvard Infantile Paralysis Commission, said recently.

"The main problem now is to find a suitable animal to yield an antitoxin."

"The only animal which takes the disease appears to be the monkey," said Dr. Aycock, "and the latter's mortality is so high that it is an unsatisfactory subject. When the proper animal for serum purposes is located, infantile paralysis will be controlled."

"Dr. Aycock pointed out that a somewhat similar problem confronted science when the diphtheria germ was first isolated and finally it was found diphtheria serum could be made from the blood of the horse."

"The infantile paralysis germ is too small to be detected even by the most powerful microscope," Dr. Aycock said, "but its presence was proved by evidence of growth. He denied that an infantile-paralysis epidemic existed. He pointed out that in Massachusetts there has been one-fourth the number of cases reported this year as compared to 1916. "Parents need not worry," he said. "Fatalities from automobile accidents are far greater than the number caused by this disease. Many children who have once had the disease will not have it again."

Girl On the Magazine Cover

Matter Is Discussed At a Meeting Held in Toronto

"They tell us that women are tired of the 'pretty girl' covers but that the men are not," said Mrs. H. M. Aitken in discussing magazines at the Toronto Exhibition.

"They are more envious than tired," said a woman out in front. "Anyway, we are sure of a decent type of girls on the covers of our Canadian magazines," said the speaker, urging her hearers to patronize the home industries in the way of literature.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Umbrella Makers Benefit

Trade Is Boomed By Wet Weather In France

Amid all the complaining about poor business that has gone on in France this year, one class of men have been singularly prosperous. They are those who make and sell umbrellas. Never, they say, has business been so booming in what is still academically known as summertime.

This year, from a climatic standpoint, France had almost no summer at all. May was fine, but May is spring. After that it began to rain—and it kept raining all through June, July and August.

Being unusually in demand, the umbrellas went up in price. Even an unpretentious one cost five dollars or more.

While curling themselves, the umbrella men kept their sense of humor—and gratitude. Their syndicate had printed and distributed 1,200 lithographs of General Delcambre, the French weather man.

Losses From Smut

Smut diseases cause heavy losses wherever cereal crops are grown. In Canada careful estimates of smut losses are available only for the last few years, and these show the average annual loss to the Canadian farmer from this source as over \$12,500,000. Government departments, agricultural colleges, and technical agriculturists are all engaged in the effort to reduce this loss.

Minard's Liniment for Asthma.

Flight Will Be Hazardous

Commander Byrd's Trip To Antarctic More Dangerous Than Any Yet Attempted

Commander Richard Byrd, who recently flew the Atlantic ocean with passengers, will undertake the most hazardous flight that has ever been made by an airman when he will attempt to reach the South Pole by aeroplane. He has already crossed the North Pole by air, but the task he has now set out to accomplish entails even greater dangers and difficulties.

For instance, he may find himself obliged to winter in the Antarctic in the event of being caught in the ice. But if all goes well, and as now planned, the flight will have been accomplished and the intrepid voyagers on their way back to civilization early in 1928.

"If all goes well" . . . These words are often on the lips of Byrd and his companions just now, for well they know, from all the data to hand, that usually all does not go well on that vast but little explored waste, which has been so vividly named "The Home of the Blizzard."

The first aeroplane to fly across this unknown huge vastness of the earth's surface will be equipped with a powerful wireless and with kite aerials that can be flown high in the air to give greater power, so that in the event of a forced landing or other untoward event the fliers will be able at once to communicate with the companions left at the base camp at Ross Bay. They will have the means ready to effect Commander Byrd's rescue.

Diarrhoea Summer Complaint HE ALWAYS USES

Mr. T. F. McGregor, McLennan, Alta., writes:—"Over forty years ago my mother used to give us Dr. Fowler's Ext.-of Wild Strawberry for diarrhoea and summer complaint. All through the years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few doses of the same old, reliable remedy and it always seems to have the desired effect, no matter what the cause."

May Secure Place On Olympic Team

Toronto Coach Predicts Saskatoon Girl Would Win in High Jump

That Ethel Catherwood, brilliant high jumper of Saskatoon, will secure a place on the Canadian Olympic team to compete at Amsterdam next year, is the opinion of Walter Knox, one of the best known track and field men in the Dominion. He is now coach of the schoolboys for the Ontario Athletic Commission. Walter claims that Ethel will be a sure winner in the high jump, and that with a little more practice, will be a factor in throwing the discus and javelin. He claims that Rosa Crosso of Toronto is the fastest female sprinter in the world and that Fanny Rosenfeldt is the best all-round girl athlete.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Fresh water can be dipped from the Atlantic Ocean for a distance of 50 or more miles off the coast of Brazil. This is due to the enormous amount of water that pours from the mouth of the Amazon.

For 100 bushels of wheat—

That's about all the trip costs, and that's why thousands of people go to the Old Country for the Holidays—an unforgettable pleasure. Are you going?

The Anchor-Donaldson Steamer "Lettin" leaves Montreal for Scotland on November 26th. The Cunarder "Ausonia" leaves Montreal November 25th for the Channel Ports.

Special Christmas sailings from Halifax for the second week in December will enable you to arrive in plenty of time for plum puddings and haggis, bagpipes and pantomimes.

German Embassy Aids British War Veteran

Provides Studio Accommodation Free To London Pavement Artist

A pavement artist, whose chief claim to patronage is that he was blown up by a buried German shell at Vimy Ridge in 1917, has been allowed the free use of a basement room in the German Embassy at London as a studio—a proof that the war is really over.

William John Stubbs, the artist, also rejoices in the patronage of some of the most distinguished men in Britain, including Premier Baldwin, Lord Londsdale, Sir William Joynton-Hicks and Ramsay MacDonald.

He has been granted a lease on a country cottage, by a high official in the Foreign Office, and last year was treated to a holiday in France by the same benefactor, "which proves," he said with a smile, "that true art never lacks patrons."

Lawyer—"Why did you kill this man?"

Prisoner—"The gun went off accidentally. I took him for some one else! It was self-defence! I was crazy! And besides, I didn't kill him!"

"Now that you are married I suppose you will take out an insurance policy?"

"Oh no! I don't think she's going to be dangerous!"

The Man With Asthma, almost looms for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

The lifetime of a good watch, experts say, is 50 years. The balance and hair-spring vibrate 157,000,000 times a year, while an equal number of ticks come from the escapement.

Relieves Sore Throat—Minard's Liniment.

To avoid imitations, always look for the signature of *Charles H. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Progress In Agricultural Methods Shown By The Adoption Of Labor-Saving Machinery

The outstanding trait of Western Canadian agriculture is its ceaseless progression. Western Canadian farming never stands still but is constantly featuring new developments. The diversity of crops extends; methods of operation are steadily being improved. In particular, the advance in the adoption of mechanical devices and the general utilization of machines to facilitate farming operations and reduce manual effort has been striking. Today, the profession of farming in Western Canada demands not so much physical strength as a practical administrative sense and a working mechanical knowledge. Manual labor requirements are steadily being reduced to a minimum and the Western Canadian farmer is becoming more and more the operator of a machine.

According to report from intelligent observers in Western Canada, the spring revealed two very marked trends in the agricultural industry of that territory, one being the greater powerizing of the large dry land farms and the other a marked increase in the favor and probable utilization of the combined harvester-thresher. Dealers in the territory report an unprecedented demand for the light farm tractor and a tremendous increase in orders for combines. Tractors have been steadily delivered at farms as they were received from the factory, while, according to one estimate, the number of combines used in Alberta and Saskatchewan this fall would be close to one thousand machines as compared with 175 in use last year.

Though combines were tried out in Western Canada as early as 1922, the year 1926 saw the first general practical test of the reaper-thresher in the territory, and the voluminous demand for the machines this year would augur a wide agreement as to their practicality in the area, which leads authorities to anticipate something of a repetition of Kansas history in this respect. The general adoption of this machine would probably be the most revolutionary factor ever introduced into Canadian agriculture. Briefly, it eliminates the operations of bundling, tying, and stacking, and threshes the grain as it goes along. Its possible effect may be judged from the fact that at harvest time the Canadian West finds it necessary to import about 50,000 additional workers, and the number naturally rises with the increase in cultivation.

As one of the world's leading agricultural countries, Canadian methods are extensively adopted and the product of implement manufacturing industry finds its way into nearly every farming country of the globe. This business may be expected to extend to the reaper-thresher in certain directions and further swell a growing trade. The value of farm implements exported from Canada in the last fiscal year reached \$17,412,947, as compared with \$13,628,341 in the previous year, \$11,542,712 in 1921-22, and \$6,878,752 in 1920.

Could Use X-Ray

When police at Birmingham, Ala., descended upon a group of negroes closely grouped around a blanket upon which lay many bills, they thought they were breaking up a dice game. But there were no dice. They searched the men and the room, but found nothing with which gambling might be done. The cases were thrown out of court when the defence attorney demanded that the dice be produced. Afterward a grinning negro approached the lawyer and said: "Boss, I swallowed them dice. We always gets little ones that's easy to swallow."

Saving the Elk

Reports from the Department of the Interior show that the elk, recently almost extinct in Canada, has now increased to about 20,000, through the protective measures framed by the Government. These animals are distributed about as follows: Manitoba, 4,000; Saskatchewan, 5,000; Alberta, 4,000, and British Columbia from 6,000 to 7,000. About 3,000 of these elks are to be found in the national parks.

New Bridge Street, London, was recently paved with rubber blocks. After six months of wear, it is said to be in almost perfect condition. The street is located in the heart of London's busiest section.

Auto salesmen in the state of Washington are forbidden to refer to the speed of their cars in advertisements. This law has been passed with the hope it would decrease reckless driving.

W. N. U. 1701

English Is Common

Speech Of Millions

Taught To School Children Of Almost Every Civilized Country

At a recent meeting of the Royal Society of Literature, attended by prominent literary men of Great Britain and the United States, the use and misuse of certain English words and national differences of pronunciation were discussed. One outcome was the decision to take steps to form an "International Council for English." This council would consist of fifty British members and fifty members from the United States. It would investigate disputed usages of words and study "Americanisms and Anglicisms."

The proposal that an international council for English be formed directs attention once again to the spread of the use of that tongue throughout the world. The various dialects of Chinese are spoken, indeed, by more people than is English. On the other hand the written language of the Chinese is so difficult to master that learned men in that country have been striving to simplify it. Spanish is the tongue of an increasing population in South American states. Russian is the language of about 150,000,000 people. English has been carried by settlers to North America, Australasia and Africa. It has long been the language of a world-wide commerce. In 1901, according to a British statistician English was spoken by only twenty-one millions of people. By 1926 it was the native tongue of one hundred and eleven millions. Today it is the common speech of one hundred and seventy millions. It will be spoken by more and more people as the populations of the British Empire and of the United States increase. Furthermore, it is being taught to children in the schools of almost every civilized country in the world. It is growing more and more into use as an international language.

Of girlish simplicity is the chic frock shown here. In View A the scalloped skirt is attractively embroidered, and is shirred at the top to the bodice having a centre front closing, a V neck, long dart-fitted sleeves, and scalloped collar and cuffs, while View B shows the same frock with the sleeves and collar omitted, and having a chic bow of ribbon at the back of the V neck, and wide lace in place of the scallops around the lower edge. No. 1578 is for misses and small women, and is in sizes 16, 18, and 20 years. Size 18 (36 bust) requires 3 1/2 yards 29-inch, or 2 1/2 yards 54-inch material, and 1/2 yard 28-inch contrasting for View A, while View B requires 2 1/2 yards 29-inch material, and 2 1/2 yards 4 1/2-inch lace. Price 20 cents the pattern. Transfer Design No. 1142 is used to trim View A. Blue and Yellow. Price 25 cents the pattern.

The average man wastes too much time feeling sorry for himself.

Developing New Grain

"Mystery Wheat" Ripens Fortnight Earlier and Yields Equals Marquis

In his first statement on his "mystery wheat" which he is developing on his farm near Wemby, Alberta, Herman Trelle, world wheat and oats king, reveals the new grain is being especially developed for harvesting by combines.

These are features of mystery wheat: The straw stands stiff even under light snow; the head does not shatter; it retains the kernels in a fast grip, even under adverse weather conditions.

The grain ripens a fortnight earlier, enabling it to stand in the field until dead ripe, without damage from frosts, thus providing ideal grain for simultaneous cutting and threshing. The yield and quality equals that of the Marquis variety.

Trelle is still developing the new wheat but hopes by the end of next season to have it accepted officially so that farmers all over the West may start growing it.

Progressive Canadian Eskimos

Rapidly Adopting The Ways Of Civilized Life

Canadian Eskimos are progressive people. The more advanced have, in their homes, sewing machines, gramophones and radio outfits. In the Mackenzie delta and along the Arctic coast the ambition of the head of the family is to own a schooner fitted with an auxiliary gasoline engine, and the high price of Arctic furs has enabled a good many to attain this objective. At Akavik, a trading village, mission station, and police post on one of the islands of the delta, as many as twenty-five of these schooners, all owned by natives are frequently to be seen at one time.

Prairie Provinces Are Making More Butter

Account For About Thirty Per Cent. Of Canada's Output

Every one of the provinces records an increase in butter production last year, Manitoba having the largest proportionate increase. A striking feature of the survey, in fact, is the position in butter production which the Prairie Provinces have come to occupy. These provinces, Alberta, Saskatchewan and Manitoba, which a comparatively short while ago did not provide enough for their own requirements, now rank third, fourth and fifth respectively, and together account for nearly 30 per cent. of the Dominion butter output.

The Boss: "Is it true that you leave your typewriter and go when the clock strikes five, even if you are in the middle of a word?"

The Stenog: "Certainly not! When it gets as near five as that I never begin a word at all."

Free church seats might be appreciated more if they were less uncomfortable.

Jokes on marriage are funny only to those who are not married.

Given Enthusiastic Reception

Traffic Halted When American Legion Delegates Marched In London

The people of London gave a wild and enthusiastic reception to a delegation of nearly 1,500 American Legion members from New York who marched through the streets creating a big traffic problem.

The Americans, in bright uniforms and bearing flags "fell in" in the Great Scotland Yard, while a crowd which had followed them from their hotels became more dense each minute, holding up the Whitehall traffic. Then the visitors marched to the cenotaph in an impressive column, made resplendent by red, white, and blue ribbons, British and American flags, and the marchers' bright costumes. A drum major of imposing proportions and gorgeous in scarlet, blue and gold, led the legion band. A women's contingent headed the marchers, bearing twelve American flags.

After placing a wreath on the cenotaph, the American veterans visited the tomb of the unknown soldier in Westminster Abbey.

Sacrifice Of Human Life

Safety Measures Necessary To Lessen Number Of Automobile Fatalities

It was freely admitted at the opening session of the 14th annual convention of the Good Roads Association of Canada at Niagara Falls recently, that in the past few years there had been an appalling increase in the sacrifice of human life due to the automobile, and this in mind Hon. George S. Henry, Ontario minister of highways, appealed to the gathering to make "safety first" the keynote of the convention.

H. S. Carpenter, deputy minister of highways in the province of Saskatchewan, stressing the fact that development of roads had followed that of the province generally, said there were now some 7,300 miles of roadway in Saskatchewan supplying some 450 market points, as compared with 4,000 in the neighboring provinces. The speaker extended an invitation to the Good Roads Association to hold their next annual meeting in Saskatchewan.

Saskatchewan Wheat

Produces Sufficient Wheat To Feed Thirty Million People

Saskatchewan produces more wheat than all the other provinces of Canada combined, enough to feed 30,000,000 people, and is exporting twenty-nine thirtyths of the production, said Premier Gardner of this province, addressing the Pacific Foreign Trade Council in Victoria, B.C. The wheat production of the whole world was 100,000,000 tons, 80,000,000 tons of which was for export. Of this latter figure Canada produces 7,000,000 tons, of which 5,000,000 is under the control of the wheat pool of Western Canada.

Prospective Buyer—"How does the land lie out here?"

Suburbanite—"It isn't the land. It's the agents."

American Legionnaires to France

Sixty members of the "Boys of '76" Bugle and Drum Corps of Post 76, Racine, Wisconsin, part of the American Legion, who sailed from Quebec recently to attend the national convention in Paris. Attired in white uniforms and steel helmets, and accompanied by brilliantly garbed drum majors, they presented a very handsome spectacle as they assembled to embark on the Canadian Pacific steamship Montroyal for Antwerp.

This corps is a part of what was considered the most stupendous transatlantic peace-time movement in

history since the first sailings of the Canadian Pacific steamers for this purpose began August 26. The Legionnaires were welcomed for the convention September 19-24, by Premier Poincare, President of the Republic, and many prominent political and military leaders in France. Among outstanding Americans to sail were General John Pershing, who accompanied the American Expeditionary Force to France, and U.S. Ambassador Myron T. Herrick.

It is estimated that well over 17,000 Legionnaires sailed from America to attend the convention.

Few Fields Left To Conquer As Out-of-the-Way Parts Of The Earth Are Mapped By Explorers

Profit In Sheep

Sheep Raising As A Side Line On The Prairies

Although the farmers of the prairie provinces will probably continue indefinitely to depend upon grain growing as their main source of revenue there are several lines of work which fit in admirably with grain growing and provide an extra source of revenue. One of the best of these sidelines for the prairies, according to E. Van Nee of the Scott, Saskatchewan, Experimental Station, is sheep raising. Many farmers are realizing this and the number of sheep in the three provinces is increasing. They prove particularly helpful to the income when the main crop is found wanting on account of seasonal conditions. The two sources of revenue from sheep, namely, wool and lambs make the proposition doubly attractive.

Sheep are useful as a channel for marketing low grade whole grain and for cleaning stubble fields. They appreciate a varied ration, however, and in districts where alfalfa or clover hay is plentiful these should be used as roughage for the breeding stock in conjunction with straw, but good results have been attained at Scott when oat straw was the only roughage fed. Probably the most satisfactory method of getting a start with sheep is to purchase a few grade ewes and use pure-bred rams. If the farmer has had no experience with sheep he should start with a small number.

Vegetables and Meat

No Proof That One Is Better Food Than The Other

Speaking of longevity and its causes recalls the fact that recently in a community in Ontario two, far from young men—one a meat eater and the other a vegetarian agreed to stake their contentions upon a ten-mile foot race. The vegetarian lost, but by so small a margin that the meat eater's victory hardly counted for much in his protestations that meat gave stamina while vegetables did not. Both runners finished in fine condition, so that it would seem as though one man's vegetable was his meat as well. The point of the whole matter, so far as those who have troublesome stomachs are concerned, is that if one likes vegetables he should eat them and lots of them, whereas he who likes meat and fads that it agrees with him should be foolish to eschew it simply because there are those who protest that vegetarians live longer and are healthier. It would have been interesting to know how a runner who ate both meat and vegetables would have finished. Both vegetarians and consumers of meat only, should occasionally give their stomachs a rest. It is puritanical self-denial and nothing more that makes one conclude that everything that looks appetizing must be indigestible.

Honey Competition At Agricultural Fair

First Time Classes In This Product Have Been Arranged

Beekeeping has been an important industry in Ontario for many years, but since the war it has made unusually rapid strides in the western provinces. Recognition of the importance of honey production as a national industry is being given this year by the Royal Agricultural Fair at Toronto, where for the first time competitive classes in honey have been arranged. At the "Royal" in past years there have been displays of honey, but no competitions. All individual exhibits must be from the 1927 crop of the exhibitor's own apiary, or if exhibited by an association or province, must be produced by an apiary within that province in 1927. In order to ensure that the displays will reflect the utmost credit on the beekeeping industry, the judges will have the right to disqualify any entries that are not attractively presented, without considering the quality of the honey.

Canadian honey has already won an enviable reputation overseas, the Ontario entries having taken top place at the Imperial Dairy show in London for several successive years.

Watch 100 Years Old

Miss Cynthia A. Plutler, White Lake, N.Y., has had her grandfather's watch wound for the first time in 100 years. The watch, which was made in London in 1771, belonged to Peter Plutler, and becoming out of order, remained unused for the century. Miss Plutler had it put in good condition and deposited it in a bank.

Only three-quarters of a century ago large tracts of the earth were completely unknown, the whole interior of the African continent was a blank on the map and in the opinion of many, probably, a prolongation of the sandy waste of the Sahara. Both Polar regions were unvisited, little or nothing had been ascertained regarding the regions of equatorial South America and the central parts of Asia and Australia. Yet in 1912 geographical authorities were able to say that the unknown no longer existed and that the world had attained almost complete self-consciousness. That qualifying word almost doubtless applied to the yet unvisited portion of the Polar regions and of the interior of Brazil. Beginning with the first great exploratory journey of David Livingstone in 1853-56, continual treks on the unknown have reduced the blank areas on the map until few fields are left for the adventurous to conquer.

Of all that remains, the most provocative challenge comes from the huge continent that surrounds the South Pole, with an area only a little less than that of the United States. Rising to an elevation of two miles above the sea with "barrier bulwarks" of precipitous ice cliffs, and seaward more "guardian packs" of floating ice, the South Polar continent long offered almost insuperable obstacles to explorers in ship or by land. To surmount them by aeroplane is easy, but then come dangers of another kind. The Antarctic has been called by one explorer, who spoke out of the fullness of personal experience, as Jotunheim, "the home of the Blizzard," where the temperature falls to 50 degrees below zero. These blizzards exacted their toll of death when Captain Robert E. Scott and the other three survivors of his successful Polar expedition perished in March, 1912, from exposure and starvation.

Commander Byrd's proposed flight to the South Pole and back, now planned for the southern summer of next year, will be the most difficult and perilous of all Polar ventures, even more so than those undertaken in quest of that more alluring goal of the centuries, the North Pole. But the greater the hardship and peril of the quest, the stronger is its appeal to men of adventurous temper and the urge will remain till it is satisfied. In the case of the Antarctic, the lure is heightened by the report of vague mineral possibilities. This will ultimately attract the prospector, as it has done in the Arctic. In the meantime, the Antarctic holds the attraction always attaching to mystery.

English Insects Recruited

New Zealand Has Appealed For Aid To Control Weed Menace

An expeditionary force of insects will be sent soon from England to New Zealand. The Dominion has appealed for aid against the gooseberry and blackberry branches and ragwort weed which has spread too rapidly. At the experimental station at Harpenden, Herefordshire, armies of English beetles and caterpillars are undergoing elimination tests to determine which bugs have the most voracious appetite for weeds and do not include vegetables and fruits in their diet.

When the insect "squadrons" are picked they will be rushed to New Zealand and turned loose against the farmers' enemies.

Wintering Steers Loose In Pens

To determine the relative merits of housing steers for winter feeding loose in large pens or tied in the stable a test has been conducted during the last three years at the Lennoxville, Quebec, Experimental Station. The results of the test show quite conclusively that larger gains can be obtained at a cheaper cost by feeding the steers loose in pens. Especially when the cost of labor and equipment is taken into consideration there is a marked advantage in wintering steers in this way.

Sockeye Salmon In B.C. Scarce

"I saw and heard of less Sockeye in the spawning areas of the Fraser River above Hell's Gate Canyon this year than in any of the preceding 25 years in which I have hunted for them there in August and September," John P. Babcock, assistant commissioner of fisheries for the province, said on his return from an inspection of the Fraser River basin above Hell's Gate. "There can be no commercial return for years hence from the Sockeye that spawned in the upper Fraser in August and September this year," he said.

WORLD HAPPENINGS BRIEFLY TOLD

A statement issued by the Commonwealth statistician shows the population of Australia to be more than 6,000,000, as compared with 2,250,000 in 1881.

The next regular conference of the International Wheat Pool will be held in Regina on June 6 to 8, 1928. It was decided by the committee of arrangements in Minneapolis.

Permission to give religious instruction to students of the provincial normal school outside of lecture hours is being sought from the Department of Education of Alberta by various religious bodies in Calgary.

Monday, November 7, will be observed as Armistice Day and Thanksgiving Day throughout Canada. A proclamation to this effect appears in the current issue of the Canada Gazette.

Col. J. G. Rattray, Winnipeg, Man., former head of the Manitoba Provincial Police, has been appointed head of the Soldiers' Settlement Board, filling the vacancy caused by the resignation of Major J. Barnett.

Towed several hundred feet under water clinging to an anchor, and then struck on the head by swinging gear as he was finally being pulled aboard his ship, E. K. Kapper, second mate of the halibut steamer New England, still survives.

For the first time in the history of the Upper Great Lakes, corn from the Argentine is passing through Owen Sound's grain elevator for distribution to Western Ontario. Forty thousand bushels have arrived from Montreal. The low price of the South American grain in comparison with United States produce was the cause of its large sale.

Captain James Kirkwood, a Kingston mariner, has the honor of carrying the first cargo into Fort Churchill, the new Hudson's Bay Railway terminal. It was learned from a letter received by relatives at Kingston, Ont. The St. Euphlyte was the steam-which Capt. Kirkwood piloted from Port Nelson.

Bad luck is reasonably sure to come to those who trust only in luck.

An Everyday Story

—Evans Studio

Francis Henry Cook

London, Ont.—"I was in a general run-down state of health. I had indigestion and my stomach was weak and so sore I could not bear to touch it. I got where I did not have any health at all, was not able to follow my usual line of work. I saw where Dr. Pierce's Golden Medical Discovery was recommended for stomach trouble so I decided to try it and it relieved me of my indigestion and weak stomach, also the abdominal distress and built me up in health. I can highly recommend the 'Golden Medical Discovery' to anyone who suffers as I did. It is excellent!"—Francis Henry Cook, 471 Elizabeth St.

All dealers. Extra large bottles, liquid \$1.35; Tablets \$1.35 and 65c.

Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for free advice.

W. N. U. 1701

Conditions Have Not Changed

Airmen Were Warned 66 Years Ago To Be Wary Of Ocean Flight

The difficulties in the path of a westward flight from Europe to the United States were emphasized 66 years ago by Professor Joseph Henry, famous physicist and first secretary of the Smithsonian Institute, in a letter to Thaddeus S. C. Lowe, inventor and aeronautical engineer.

A copy of that letter has just been unearthed in the archives of the Smithsonian Institute. What Professor Henry said in 1861 relative to trans-Atlantic wind conditions is regarded by meteorologists and aviation experts here as having a pointed bearing on some of the conditions faced in recent attempts to fly between Europe and America.

Lowe at that time was occupied with a scheme to fly from America to Europe in a balloon—the largest which had ever been built. Not only did he spend much money on the venture but he had the support of eminent Philadelphians including George W. Childs, John C. Cresson, J. B. Lippincott, William Hamilton and others who contributed several thousand dollars to further Lowe's efforts to demonstrate the feasibility of trans-Atlantic air navigation.

In December, 1860, sixteen eminent Philadelphians, including those named, petitioned the Smithsonian regents to furnish him aid and advice. The regents decided they could not make an appropriation from the Smithsonian fund for the Lowe venture but directed Professor Henry to give Lowe any advice he might "deem fit as to his experiments."

Professor Henry told Lowe that a balloon of sufficient size, properly constructed so as to maintain high elevation for sufficient length of time, would be wafted across the Atlantic, because between 30 and 60 degrees north latitude, the prevailing wind currents were from the United States toward Europe, but he advised Lowe not to try the experiment over the ocean first.

Professor Henry said that the prevalent wind was westerly all the way around the world, and that packet ships in the sixties from New York to Great Britain "occupy nearly double the time in returning that they do in going."

Distribution Of Peonies

The Mount Royal Peony Fields Distribution Committee of Montreal, officially announces that a movement is on foot to send blooms of Peony roses every July to the other countries of the world. Two years ago these peonies established a record when 10,000 blooms were sent to Wembley and won the Royal Horticultural Society's Banksian medal.

Count Gottfried Bismarck, grandson of Germany's Iron Chancellor, who has been spending a few days in Winnipeg and the Canadian west studying agricultural and wheat marketing methods of Canada, is visiting also Chicago, Ottawa and Toronto. No person in Germany contemplates the return of the Kaiser. Count Bismarck believes Germany wants to forget the war and all that went with it, her only ambition now being to rebuild after the wreck of conflict. Count Bismarck has been much intrigued by what he has seen and would like to spend more time in Canada.

Claims Human Brain Emits Radio Waves

Italian Professor Says He Has Secured Photographic Records

Professor Ferdinando Cazzanelli, of the University of Milan, who two years made the startling assertion that the human brain emits radio waves, now claims to have photographic records of these emanations.

A paper describing his experiments was read in Paris before the International Congress for Psychic Research which opened here recently.

Prof. Cazzanelli wrote that in order to make his studies more complete in regard to the psycho-sensorial phenomena of the brain he had constructed an apparatus containing a sensitized plate. Subjects in a state of hypnosis were placed one after the other in a room with this apparatus and later it was found that the sensitized plates were marked with lines and blotches. These markings, the professor contends, corresponds to the thoughts of the subjects, being more or less straight as the subject was more or less of nervous temperament.

The phenomena, he added, were not found in persons of unsound mind.

Opening To Be Delayed

Saskatchewan Legislature Will Open Early In The New Year

The session of the Saskatchewan Legislature will not be held before but as soon after the New Year as possible. A statement to this effect was made by Premier J. G. Gardiner. The fact that the session is so late and that there is a conference to be held of provincial prime ministers in Ottawa in November are understood to be the reasons for deciding not to open the Legislature before the New Year.

A liquid which renders wood fire-proof has been patented by a Norwegian.

Lots of people seem to go to church for the purpose of picking flaws in the sermon.

Given Practical Test

Alberta Tar Sand Has Been Proved Excellent For Surfacing Roadways

Away back in 1913, S. C. Ellis, field engineer for the Dominion Department of Mines, floated into McMurray on a waterlogged scow to investigate the Alberta tar sands. In the intervening years the commercial possibilities of these deposits of bituminous sands have been considered with more and more attention, but it is only during the present season that they have been given a practical test of any consequence. Three miles of roadway connecting the station at Jasper Park, Alberta, with the Lodge, have been paved with the natural asphalt. Part of the surface was laid last winter, and A. W. Haddock, city engineer of Edmonton, stated recently that the roadway had withstood perfectly all sorts of weather and all traffic conditions.

To pave the road at Jasper, Mr. Ellis shipped 70 carloads of the sands—an amount far greater than the total shipped in all preceding years. Then he built a new type of heating and mixing plant, at a cost of \$2,000, with a daily production of 520 square yards of two-inch compacted surface. The final cost of the paving at Jasper was \$1.04 a square yard, while pavement from imported materials costs \$1.23 at Edmonton. It is estimated that when economies are made in the system of loading the raw material at McMurray it will be possible to reduce the cost laid down at Edmonton to approximately 55 cents for a square yard two inches thick, and this, according to Mr. Haddock, will enable Alberta to build the best and cheapest roads on the continent.

Mr. Ellis long has held the opinion that these tar sands constitute one of our greatest natural resources, and events at last seem in a fair way to prove him right.

Has Fairly Warm Climate

Temperature At Equator Of Mars Over Sixty Degrees

Not many years ago it was thought that the temperature of Mars was too low to support life. But by an ingenious device for measuring the temperature of the planet, it has been found that even in the Polar regions the temperature rises to well over freezing point. The temperature at the equator of Mars is almost that of a clear sunny spring day on earth in the latitude of New York, or between 60 and 70 degrees Fahrenheit.

Photographs taken in infra-red, yellow, and ultra-violet light seem to show that the planet has an atmosphere of considerable depth, though much rarer than that of the earth. Other observations show that the density of the surface atmosphere of Mars cannot be greater than it is eleven miles above the surface of our own planet.

While Mars can be observed to advantage by the telescope only in alternate years, and then for only a few months at a time, Jupiter can be observed all the year round, always presenting an interesting subject of study, except for a few weeks when it is too near the sun to be seen to advantage.

Jupiter has many curious light and dark belts that lie parallel to its equator and seem to be formed of denser vapours than their surroundings. The planet is spinning round on its axis once every 9 hours 50 minutes at its equator and every 9 hours 55 minutes in its higher latitudes. Objects at the equator are carried round at the rate of 30,000 miles an hour, or eight miles a second compared with 1,000 miles an hour, at the earth's equator.

U.S. As Melting Pot

Names Reflect Vast Racial Invasion Of New York City

Another reminder that this is no longer an Anglo-Saxon country is found in the names of the candidates for the football team of the College of the City of New York, now in camp at Lakeville. Here is the list complete: Bokai, Rosner, Payson, Clark, Elterich, Puelo, Schlaechter, Halpern, Dresnick, Rotbart, Vance, Gannon, Resnick, Rosensweig, Barkman, Glenstock, Forstner, Blumh, Cohen, Spindel and Goldhammer. These names are a reflection of the vast racial invasion of New York city from the east and south of Europe. Yet many a rural college football squad this fall will show that the tide of the new immigration has reached far beyond urban confines to our rural regions.—Providence Journal.

The lowest temperature ever recorded in the civilized world was at Verkhoyansk, Siberia, in 1852, when the thermometer touched 90.4 degrees below zero.

"My wife has run away with a man in my car!"
"Good heavens; Not your new car?"

SUNDAY SCHOOL LESSON

OCTOBER 9

ELIJAH HEARS GOD'S VOICE

Golden Text: "Wait for Jehovah; be strong and let thy heart take courage."—Psalm 27:14.

Lesson: 1 Kings 19.

Devotional Reading: Psalm 57:1-5.

Explanations and Comments

1. The Despondent Prophet, verses 9, 10.—Elijah's reaction after his great exaltation was most natural, as every one must realize from his own experience. The ebb follows the high tide; depression succeeds exaltation, the fire died down within Elijah's soul, the situation in Israel seemed hopeless. He sought a cave on Mount Horeb, and there was made aware of God's "listening ear and sympathizing heart." There is nothing unreal in his meeting there with God, for "the prophet's own soul, inspired by the God within him, shaped it in his imagination." While meditating there he was brought to face the question of his own motive in withdrawing to the wilderness: "What does thou here, Elijah?" Should he answer that he had run away from Jezebel? That he was utterly discouraged, and had perhaps purposed giving up his work on the mount which he thought of as especially "the mount of God?"

"The first step in waiting upon God is always self-examination, the uncovering of our inmost heart, the laying ourselves naked before God's eyes. His Spirit cannot breathe itself into us while we are preoccupied with motives of our own. The soul must first be swept clear by confession. What doest thou hear, Elijah? Examine yourself; review your life; face the facts, facts without and facts within; know yourself; and then when all subterfuge, all subtle hypocrisy, all self-delusion is done away, the ear may at length be open to hear the voice, not of your own will, but of God's."

Elijah could honestly answer that he had been very jealous for Jehovah, the God of hosts. Our words jealous and zeal are of kindred origin, and may be traced back to the Greek word which means boiling. To be jealous for some one is to be burning with zeal for that one's interests. Elijah's whole life was marked by his zeal for God. The necessity for his zeal lay in the fact which is next related, that the children of Israel had forsaken God's covenant, had thrown down his altars and slain his prophets with the sword. He thought that all hope of reformation of the people was lost, for the prophets were the only ones who could bring about a change for the better. "And I, even I only, am left," he wailed; "among the faithless, faithful only he," as Milton puts it. Moreover, his life, the life of the only living prophet, was in danger.

Ex-Kaiser Predicts

More Terrible War

Still Asserts He Could Show World the Way To Peace

Former Kaiser Wilhelm foresees another war in 1937, he told a correspondent of the Copenhagen "Dagens Nyheder" in an interview in which he asserted he could show the world the road to peace.

Wilhelm evidently has slight regard for the League of Nations, which he says is either blind or blindfolded. The League delegates, he compares with children riding wild horses—they might be thrown off the next moment.

"I am even certain that many of those powers talking about disarmament do so in order to inspire greater confidence, thus disguising their purposes," said the former Emperor. "According to my opinion, we shall go through another and more awful war at the latest in 1937, a war which will last only a few days and possibly only a few hours."

"In the same moment that war is proclaimed giant fleets of airplanes, airships and U-boats will be informed by wireless. Merchantmen will be destroyed immediately and a nation unprepared for it will be exterminated within forty-eight hours. On land and sea new and perilous gas and explosives unknown in Germany will be employed and annihilate the weaker nations within a moment."

The former Kaiser maintains that he is surrounded by spies with orders to prevent him from "endangering the world," and regrets being unable to return as a sovereign to teach the world how permanent peace might be secured.

"But as things now are there will always be wars," Wilhelm concluded. "I could show the road to peace, but the world prefers regarding me as a seagoat to consulting me as an adviser."

Modern Camping

Willis: Hello, old man; where have you been?

Gills: Just got back from a camping trip.

Willis: Roughing it, eh?

Gills: You bet. Why, one day our portable dynamo went on the bum and we had no hot water, heat, electric lights, ice or radio for almost two hours.

Hydro-Electric Power In Canada

By the end of the year 1926 Canada's hydraulic power installation reached a total of 4,556,266 horsepower of which 265,838 horse-power was installed during that year.

The Proven Remedy for HEMORRHOIDS (Piles)

You can positively depend upon Anusol Suppositories as a safe treatment for Hemorrhoids.

These Suppositories are not an experiment. Back of the box you will find a century's record of successful healing. Ask your doctor. He will recommend Anusol Suppositories. He will tell you that there is no safer or better non-surgical remedy for Hemorrhoids (Piles).

Your druggist can supply you. Or write us for one dozen—postpaid for \$1.50. Canadian & Foreign Agency Company, Unity Building, Montreal.

ANUSOL SUPPOSITORIES

Duty Of Motor Drivers

Whole Thought Should Be Safety For Themselves and Others

The main principle which should be insistently hammered into the heads of all drivers of motor-vehicles is that, besides obedience to the golden rule of "safety first," the obligation which they must fulfil is constant, thought for others. It is their duty to the community to drive always in such a way that both in approaching corners and in overtaking other vehicles safety for themselves and other users of the road can be secured with the least possible use both of the horn and the brake. In other words, wherever other vehicles or foot passengers are in question, their pace should be so regulated and so fully under their command that they can in case of need easily bring their car to a standstill. Between safe driving and needless driving there is an intimate connection, and it is chiefly forgetfulness or ignorance of this fact that makes so many of those who use the roads a menace and a nuisance to their neighbors.

Established A Record

English Dock Laborer Eats Twenty Dinners In Four Hours

By eating 20 substantial dinners in four hours, Henry Bullion, a dock laborer of Surrey, England, recently established a record in gastronomy that probably no other Englishman will attempt to equal or surpass. Bullion is an ultimate consumer seems to be in a class by himself. He disposed of the 20 dinners to win a wager.

It all arose over the statement of a patron of the dockland hostelry, Prince of Orange, that he knew a man who could eat 20 of his dinners, as substantial as they are admitted to be. The landlord accepted the bet, only to lose it. Henry, in four hours, consuming 10 pounds of beef, 18 pounds of potatoes, and six pounds of cabbage, together with the other garnishings constituting the menu of steak-pudding, potatoes, cabbage and gravy.

When Making Repairs

If called upon to change a tire or make a minor car repair while on the highway, one should remember to pull entirely off the road. If this is not possible at the place where the difficulty occurs, it is the part of wisdom to drive on for a short distance to find a better spot. Working on the left side of the car, on a well travelled highway is exceptionally dangerous even in the daytime. At night, it may amount to foolhardiness.

There are said to be 3,421 languages and dialects in the world, distributed as follows: America, 1,624; Asia, 937; Europe, 587, and Africa, 276.

TRADE MARK. No. 1 for Bladder Catarrh, No. 2 for Blood & Skin Diseases, No. 3 for Chronic Weaknesses. Sold by leading Chemists, or sent post free from Dr. LECHEMED Co., Haverstock Hill, N.W.5, London.

"The water is lovely today, is it not, Mr. Cafard?" "No, detestable!" "Do you think so?" "Yes, I have tasted it!"—Le Moustique, Charleval

Air Mail Service For Canada Is Being Seriously Considered

Vancouver.—Although air mail service for Canada is not a possibility of the immediate future, it is being seriously considered, Hon. P. J. Veniot, postmaster-general, said here today.

While the post office department had not made any definite plans it has been studying the situation for some time, he said. He referred to the present service for trans-Atlantic mail from Father Point to Montreal, and he said reports of the Royal Canadian Air Force, under whose supervision the service was being conducted, showed that it had been highly successful. From these reports the post office department will be guided, he said. Inauguration of a service across Canada might possibly be considered by the civil branch of the Royal Canadian Air Force.

With the extension of commercial aviation it might be possible that the work would be done under contract by private companies.

In any event, Mr. Veniot said, the increasing interest in aviation would result in organization of commercial companies to handle freight and mail, when this condition arose the department would consider what steps it should take.

Bank Robbery Frustrated

Presence Of Mind Of Calgary Bank Manager Fells Bandits

Calgary.—Three bandits who attempted to hold up the Hillhurst branch of the Royal Bank of Canada here were frustrated through the presence of mind of R. M. Grainger, manager of the bank. He heard the command "put them up" and turned to look down the barrel of a revolver held by one of the bandits about seven feet away, across a counter.

Mr. Grainger threw up his hands at the same instant jumping sideways into his office, where his gun lay in his desk. He grasped this and began to shoot at the shadows of the men through the frosted glass partition. He shot four times and the two clerks, who by this time had been able to seize their guns also opened fire on the retreating bandits. In all seven shots were fired.

May Not Attend Parley

Uncertain Whether Premier King Will Go To Continental Congress

Ottawa.—Considerable uncertainty exists as to the likelihood of Premier W. L. Mackenzie King accepting an invitation to attend the sesquicentennial of the sitting of the Continental Congress in York, Pa.

While the prime minister is at present out of the city, it is intimated that on his return he will be busily engaged in preparations for the conference of provincial premiers to be held here early in November. No decision has yet been reached by Hon. William Phillips, United States Minister to Canada, as to whether he will attend the centennial.

B.C. Exhibit For Winter Fair

Victoria.—Preparations are almost complete for British Columbia's exhibit at the Toronto winter fair in November. The government is assembling a large display representative of agriculture generally to give some idea of the progress in farming in this province. Dr. David Warner, deputy minister of agriculture, will attend the fair, representing the department.

Would Restrict Sunday Trade

London.—Several large organizations in the retail trade are promoting a bill to be submitted to Parliament calling for the restriction of Sunday shopping which, in the past few years, has grown enormously, particularly in London.

Communist Party Is Reported To Be Losing Ground In Great Britain

London.—Some interesting figures have been furnished by the central executive committee of the British Communist Party in connection with the annual conference which will be held shortly.

It is stated in the committee's report that a membership of more than 10,000 was registered last year when the country was affected by the strike of the coal miners and the general strike in connection therewith, but

South Africa Will Erect Mooring Mast

Wish To Contribute To Inter-Empire Airship Service

Durban, South Africa.—The Hertzog Government has concluded an agreement with the Imperial Airways Limited, London, for the erection of a mooring mast at Tongaat, Natal, 30 miles from Durban. A large aerodrome will be established at Tongaat.

In connection with the projected mooring mast, it was reported some months ago that it had been agreed that the airship service should be controlled by South Africa's railway administration and that approximately \$350,000 would be spent on the mast itself.

It is understood that the Government committed itself to construction of a mooring mast as the contribution of the South African Union to the inter-empire airship service.

Plan Subways For Montreal

Huge Project Would Provide Subway Lines and Abolish Level Crossings

Montreal.—Initial steps have been taken, it was officially announced, by a group of local interests connected with financial houses in New York to enter into a \$200,000,000 project with the city, province, Federal Government and railway companies to abolish level crossings in Montreal, construct a grand central terminal station and construct underground tram facilities.

The work in view comprises, it was stated, the abolition of all level crossings in and entering the city either by elevating them or putting them underground. The proposition which it is stated is being made to city, provincial and Federal Governments beside the railway heads, would provide for collaboration of all these bodies in the financial arrangements.

Russia Planning To Buy Montana Horses

Increased Price In Western Canada Too High Is Report

Quebec.—Canada's second consignment of horses to Soviet Russia is now on the high seas, the Russian steamer Dakabris having left Quebec with 1,100 animals for Leningrad.

Captain Smirnov, in charge of the ship, said before leaving that Russia is looking towards the state of Montana to supply her with horses, due to the action of Western Canadian farmers in raising the price of their animals to \$30 each. Montana and other states are willing to supply the horses at \$12 per head, he said.

The Dakabris will be back here early in November for her third and last trip of the season.

Eugene Chen Married

Reported Marriage In Moscow Of Former Nationalist Foreign Minister Of China

London.—The God of Love seems once more to have won out over the God of War in the Chinese Nationalist movement.

The Riga correspondent of the Daily Mail quotes an official Soviet despatch to the effect that Eugene Chen, former Nationalist Foreign Minister, and Mme. Sun Yat Sen, widow of the father of the Nationalist movement, were married in Moscow.

The newspaper reports the couple intend to spend their honeymoon in China by starting a new revolution, and adds that the Third Communist International is financing the activities of the bridal couple.

Young Orator

Frederick Hinton of Tavistock, Ont., Canada's champion orator who has just reached home after his prize trip, won in the Canadian oratorical contest. He visited Scotland, England, Belgium, Switzerland and France. He will compete on October 14 in the international oratory contest at Washington.

Aviators Safe After Long Desert Flight

German 'Plane Delayed By Detour Ordered By Turks

Bagdad, Iraq.—Lieut. Otto Koehnke, pilot of the Germania, whose arrival here cleared up the mystery of his whereabouts since his take-off from Angora, Turkey, said that his delay in reaching this place had been due chiefly to the instructions given him by the Turkish authorities on leaving Angora as the route to be followed.

The German aviator, who is en route to the U.S. by way of the Orient, said that the instructions involved a wide detour, the Turkish idea being apparently to prevent foreign aviators from flying over certain areas of Turkish territory.

The aviator said that he had halted at Aleppo and then had deferred his departure for Bagdad in order to avoid flying in the hottest part of the day.

Would Make Britain Dry

Evangeline Booth Convinced That Prohibition Is Possible In England

London.—Commander Evangeline Booth of the Salvation Army, to whom a welcoming reception was given in a big London hall, is convinced that prohibition is a big possibility for England.

"If I were over here and had the help of Lady Astor, we could bring prohibition into England in no time," she is quoted as saying in an interview.

The Commander, who is making her first visit here since 1920, talked strongly on the benefits which she said prohibition had brought to the United States. "I would say to every country, if you want to be rich introduce prohibition and banish drunkenness and inefficiency."

Preparing Customs Report

Ottawa.—Three more weeks will be required to complete the report which the Royal Commission on customs will present to the Governor-in-Council. The three commissioners are hard at work on the report, which will, it is expected, be voluminous.

Gypsy Children Ask For Separate School

Pupils In Czecho-Slovakia Fear Those Of Other Tribes

Prague.—School children in the town of Homonna, Czecho-Slovakia, have struck for separate schools because of their instinctive fear that the swartly juvenile nomads beside whom they sit have cannibalistic instincts.

Striking children have been strongly supported by their parents, who declare their children are in danger of being eaten. Seeing the force of their arguments, the authorities have decided to build a separate school for Gypsy children, which, it is believed, would be the only one of its kind in the world.

The present protest grew from alleged cannibalistic orgies for which 36 gypsies are now awaiting trial. They are said to have confessed to murdering and devouring scores of persons, pleading the times were bad and they could not afford to buy ordinary meat, but that they did not see "anything wrong in eating human flesh."

Will Study Canada's Methods

Imperial Conference To Investigate Forest Survey By Air

London.—Taking a lesson from Canada's scheme of surveying forests from the air in order to destroy pests, and also from Canadian anti-pest methods against crop damage, the Imperial Agriculture Research Conference, which meets in London, will consider the best means of carrying on a crusade against pests throughout the Empire.

Thirty dominions and colonies will be represented at the conference.

It is estimated that fully twenty per cent. of all the Empire's crops, especially in the tropics, are lost annually through the ravages of insects.

The conference hopes to establish research bureaus in many of the dominions and colonies, with the object of making war on all sorts of pests. In this connection, a special study will be made of what has already been accomplished in Canada.

Completes Long Trip

British Aviator Makes Record For Long Distance Solo Flight

Capetown, South Africa.—Lieut. H. H. Bentley, instructor for the South African air force, who left Hendon, England, on September 1, in a light motor airplane for Capetown, completed his long solo flight of more than 7,000 miles.

Lieut. Bentley, who made the trip in long hops to prove the feasibility of London-Capetown air communication and to demonstrate the capabilities of a light plane on long distance flights, created what was said here to be the world's record for a long distance solo flight.

The aviator, who had hoped to make the trip in 19 days, found 28 necessary for the long trip, some of it over hazardous and deserted country.

Paralysis In Sweden

Stockholm.—The infantile paralysis outbreak reported in various parts of Europe has reached Sweden, cases being reported from two provincial districts. At Marina, a military training field north of Stockholm, a young conscript died from the disease, and in the neighborhood of Oerebro, west of the capital, several children are ill, but none fatally thus far.

Transportation Problems Of Canada Very Wide And Very Complex

Australia's Tariff On Automobiles Raised

Canadian Manufacturers Will Suffer Under New Ruling

Sydney, Australia.—The new Australian tariff, effective immediately, will have its effect on the Canadian automobile export trade with Australia, which during the past two years has averaged \$7,500,000 in value.

Canada comes under the intermediate tariff in Australia, hitherto the duty charged by Australia on un-assembled motor chassis from Canada has been 1½ per cent.; this under the amended scheme will be increased to 12½ per cent. The former rate of 12½ per cent. on assembled chassis is raised to 20 per cent.

The new tariff in the case of the United States, will be increased from 12½ to 17½ per cent. in the case of un-assembled chassis, and from 17½ to 25 per cent. in the case of American made assembled chassis.

English made assembled chassis will be admitted to Australia free of duty, while an impost of 5 per cent. is put on assembled English chassis.

The minister of customs said he hoped the new tariff might cause a good deal of the trade in motor cars to shift from United States to British and cause a stimulus to inter-imperial economic development.

Praises Canada's Judicial System

Method Far Superior To U.S. Says New York Official

Toronto.—Canada, in its administration of justice, is way ahead of the United States, stated William Lewis Butcher, chairman of the executive committee of the Big Brotherhood and Sisterhood Federation and also a member of the New York State Crime Commission, in an interview here.

"The country spends too much money on jails, penal institutions, and the like," said Mr. Butcher. "Further expenditures will be necessary for some time because proper emphasis has not been laid on the preventative side."

Had To Acquire Accent

New York.—Lady Patricia Russell, who ran away from home as a girl of 17, to become a maid in an English country house so that she might study characters and acquire a cockney accent, for stage work, is in New York, to appear before the footlights, under the name of Pamela Dartrey. Lady Russell is a grand daughter of the late Marquis of Dufferin, once Governor-General of Canada.

C.P.R. Earnings

Montreal.—The gross earnings of the Canadian Pacific Railway for August were \$17,258,624, an increase of \$528,460 over the gross earnings during the same month in 1926. The working expenses for the corresponding period, however, showed an increase of \$1,071,687, representing a decrease of \$143,227 in the net profits, compared with August 1926. Net profits for August 1927 were \$3,862,148. 11.

Saskatoon.—"In changing from Port Nelson to Fort Churchill I believe that we have removed the greatest possible handicap to the successful development of the Hudson's Bay Route," said Hon. Charles A. Dunning, Minister of Railways and Canals, addressing a capacity audience here.

Hon. J. A. Robb, minister of finance, appeared on the same platform with Mr. Dunning, and reviewed taxation legislation of the Liberal government at Ottawa.

Mr. Dunning said that the transportation problem was very wide and very complex. The story of transportation was the story of the growth of the country. To the development of transportation facilities Saskatoon and district owed the place it occupies today, for without transportation the natural resources of the country could not be adequately tapped. Touching on the grain rates in connection with transportation, Mr. Dunning remarked that as an exponent of the province, he might be pardoned for expressing satisfaction at the termination of the long drawn out fight for the equalization of the rates east and west, on the basis of those applying on the main C.P.R. line.

By this the farmers of Northern Saskatchewan would be saved about \$2,000,000 on the handling of the present and succeeding crops, and they would enjoy rates lower than any other grain structure of a similar nature in the world. Farmers had every reason to feel gratified with this, but they also had to consider the position as the proprietors of the C.N.R. They could not have this reduction without a reduction in the railway revenue. The manager of the C.N.R., Sir Henry Thornton, had pointed out to the speaker, that wage increases meant that they would be paying out \$6,000,000 more this year than last, and he thought it likely that, allowing for the reduced rates as well, the net return from the railway this year would be \$3,000,000 less this year than in 1926.

They could not make wage increases that Sir Henry thought were fair and proper, and make freight reductions that he, the speaker, thought were fair and proper, without reducing their earnings, said the minister, and he thought it was to the credit of the management and control of the railways that the falling off would be only about \$3,000,000.

Death Of Newspaper Man

W. J. Wilkinson, Of Toronto, Was Veteran Journalist

Toronto.—The death occurred at his home here of W. J. Wilkinson, news editor of The Mail and Empire, Toronto. While in recent weeks Mr. Wilkinson's health had not been of the best, he was daily at his post in the newspaper office and therefore his sudden passing came as a shock to his colleagues and friends.

For more than 40 years he had been an outstanding member of the Toronto working newspaper force and prior to that was employed on newspapers in St. Thomas, Ont. He was about 70 years of age.

Heavy Loss Of Life And Property Damage As Tornado Hits St. Louis

St. Louis, Mo.—Sixty-nine persons were known to have been killed, 575 injured and property damage conservatively estimated by the Globe-Democrat at \$75,000,000 was caused by a tornado which devastated an area of six square miles here.

The fatality list was expected to increase with the deaths of critically injured and the discovery of other bodies. The total number of injured was estimated at 1,000, as hundreds received treatment by private physicians and made no report to hospitals or police.

The Globe-Democrat estimated 5,000 or more buildings, residences and business houses were demolished or damaged.

Striking the beautiful west end of the city, the tornado came out of the southwestern skies. The twister reached a velocity of 90 miles an hour in a few seconds and subsided as many minutes later to be followed shortly by brilliant sun shining through wind-torn clouds.

The west side, a section of houses of moderately wealthy St. Louisians, lay covered with a blanket of uprooted trees, torn timber and bricks, out of which crept injured men, women and children, black and grimy as though emerging from a coal mine.

It is estimated that 2,500 houses were either wrecked or damaged, while the streets and boulevards were clogged with fallen telephone poles and hundreds of the city's most beautiful trees. Trolley wires torn from their supports spat blue flame as they met the car tracks and the shouts of policemen kept terrified people from injury or death from the "live whips."

With telephone service demoralized, it took the city several minutes to learn what had happened. The news of the tornado was flashed over the city by radio and others in parts of the city unvisited by the storm were in terror as they awaited word from the schools in the tornado district.

Doctor Made Indian Chief

Another Englishman has left Canada bearing with him the highest title of one of the famous Indian tribes of the Western plains. The title of "Chief Bear Head" was conferred upon Dr. Edward Brown, of the Poultry World, London, England, by Chief Running Antelope of the Sarcee Tribe.

The ceremony took place on the Burns Ranch near Calgary, recently, during the Canadian Pacific western tour of the World Poultry Congress. Delegates of which party Dr. Brown was an outstanding member.

The photograph shows Dr. Brown shaking hands with Chief Running Antelope after he was accepted as a member of the Sarcee Tribe.

An Asset Of Importance

Government Geologist Of New South Wales Believes Western Coal Output Will Increase

As the centre of Canadian population moves westward, the demands upon the coal fields of Alberta and Saskatchewan will increase," observed Dr. E. C. Andrews, government geologist of New South Wales, while in Saskatchewan recently as one of the party of 325 of the Empire Mining and Metallurgical Congress.

Impressed with the great success of the congress, Dr. Andrews said he was pleased to see the tremendous coal industry and the vast resources within the Empire, of which about one-seventh of the world's known supply was in the Alberta field.

"The coal fields of Alberta have immense possibilities," he said, with the observation that the difficulties of transport, and the great distance to the eastern centres of population were delaying the full development of the pits.

All practical miners in the party had been much interested by the methods used to mine coal from the bituminous fields.

The rock tunnel isolated panel system with 200 feet between each panel is a great protection against fire, he said. To the ordinary citizen that system of mining would mean little but the saving methods preserve thousands of tons of coal and protect miners from danger.

The methods of mining in the Canadian area were similar to those of at least one mine in New South Wales, he said.

The large slopes at Sullivan, the concentrating plant and smelter at Trail, B.C., and the zinc plants and smelting industries had all been of great interest to him, said Dr. Edwards.

"The Dominion has developed markedly in the 20 years since I was here last. The growth of the West has been miraculous. The school systems, the technical facilities and the institutions of higher education are all a monument to the men and women who are building Canada.

"Of course, you realize that we are anxious to see trade with Canada developed. We are more than anxious to see trade develop between the various parts of the Empire."

The Wise Business Man

Does Not Give Up Unless He Has Something Else To Interest Him

Business men will read with amusement and advantage the story of Edward F. Hatch, the broker, who sold his seat on the New York Stock Exchange for \$194,000, intending to retire, and less than three months later bought it back at an added cost of \$24,000.

He was probably very wise. Many a business man goes into a decline when he gives up his business and finds he has nothing in the world to really interest him. It is interest and enthusiasm in life that keep us young and even keep us alive after middle-age.

Be sure, before you retire, that you have accumulated outside interests that can keep up your pep and enthusiasm after your business is down.

Apples In Canada

Apples are Canada's leading commercial product in fruit. Since 1888 when seed was imported from Riga, on the Baltic Sea, continuous efforts have been made to originate new and better varieties of apples for Canada. In a recent report of the Horticultural Division of the Dominion Experimental Farms descriptions of eighteen new varieties named during 1925 are supplied.

A Neat Retort

She had very red hair. A rude boy entered the car, glanced at her one or twice, tittered, and then edged away to the far corner.

"Excuse me, miss," he said grinning. "I mustn't get too close to you, or I might get burned, you know."

But she was a bright girl and quite equal to the occasion.

"Don't worry," she replied, "you're much too green to burn!"

Nesse's Mountain

Nesse's Mountain, on the International Boundary between British Columbia and Alaska, is 8,105 feet high. It was named after Count Charles de Nesse, Minister of Foreign Affairs in the Russian Government and plenipotentiary in the negotiations between Russia and the United States regarding the Alaska Boundary.—Geographic Board of Canada.

Only an expert shopper can visit seventeen stores in one afternoon and escape without spending a cent.

W. N. U. 1701

Utilizing Power From Sleeping Volcanoes

Italy Now Using Steam Energy For Industrial Purposes

To engineers it has long seemed a gross waste that the tremendous energy of volcanoes should not be harnessed and put to work.

Already means have been found whereby steam from subterranean sources can be utilized for industrial purposes, says the Dearborn Independent. In Italy electricity derived from volcanic heat is sent over wires to Florence, Leghorn, Plorence, and other cities and towns for light and power.

In Bolivia the government has granted a concession for the use of steam from Mount Tatlo. In the Sud Lopez district, near the Chilean frontier. The volcano is to be made to drive turbine engines which are expected to electrify all the Bolivian railroads.

The wells are bored usually to a depth of about four hundred feet, and are lined with iron tubes eight to sixteen inches in diameter. At the mouths of the puffing holes, both natural and artificial, the pressure of steam remains always the same, year after year, the subterranean heat supply being apparently inexhaustible. Nowadays the water is evaporated in huge lead-lined pans, beneath which live steam fresh from the depths is conducted through coils of pipe.

Boring for steam has been going on for more than a year near the crater of Kilauca, on the island of Hawaii; but the rock is basalt and extremely hard, so that the drills have not penetrated very far. It is said that the scheme in that locality does not promise well. But the Hawaiian Government is working on a plan, seemingly practicable, for making bricks of molten lava from the Kilauca crater. It is proposed to extend a trolley across the crater, carrying an endless chain of buckets, which would scoop up the liquid lava, carry it to the rim of the fiery hole, and pour it into molds.

Papers One Cannot Buy

Scotland Yard Has Publication Only Seen By Officials

If your newspaper agent boasts that he can obtain any paper you desire, order a copy of "Hue and Cry," and he will have to admit himself beaten. This paper is published by Scotland Yard, and although it is the daily connecting-link between Scotland Yard and every town and district in the Kingdom, only police officers and high officials ever see it.

It contains "private and confidential" information concerning men and women who are wanted but have vanished from their familiar haunts, vivid word sketches of missing persons, and many precious items that notorious crooks would give much to know.

Have Curative Qualities

Almost All Fruits and Vegetables Make Excellent Remedies

Most vegetables and fruits have curative qualities. Spinach has a direct effect upon the kidneys, and onions, garlic, leeks and shallots possess medicinal qualities which have a marked effect upon the circulatory system.

A raw onion eaten before going to bed is an excellent remedy for insomnia, whilst soup made from onions has a soothing and restorative effect upon weak digestive organs.

The lettuce and the cucumber cool the system. Beets and turnips are excellent appetizers, and celery has such an admirable effect upon the nervous system that it has been known to cure neuralgia and is of great use in rheumatic cases.

Tomatoes are good for the liver. Figs, currants, cherries and strawberries are cooling and purifying. Eaten first thing in the morning, an orange will cure dyspepsia.

Dominion's Nickel Production

The nickel production of Canada constitutes 85 per cent. of the world's output. This is derived from the Sudbury district, Ontario, supplemented to a slight extent by the nickel recovered as a by-product from the treatment of the silver-cobalt-nickel ores of the Cobalt area.

Catgut, contrary to its name, does not come from cats, but is prepared from the intestines of sheep.

Increase In Livestock

Number Of Horses, Cattle, and Sheep Show Increases In Prairie Provinces

While Manitoba had 6.35 horses per farm in 1926, as against 6.43 per farm in 1911, Saskatchewan in the period has increased her number from 5.34 to 9.34, and Alberta from 6.72 to 9.97. This would indicate that the tractor and other mechanical power is by no means ousting the horse in farm operation. In the period cattle per farm have increased in Manitoba from 9.98 to 11.43; in Saskatchewan from 6.67 to 9.79; and in Alberta from 12.21 to 15.04. Manitoba, which had .86 sheep per farm in 1911, had in 1926, 2.12; Saskatchewan increased its figure from 1.20 per farm to 1.37; and Alberta from 2.21 to 6.17. This latter is due to the addition of large range herds as well as the more general adoption of sheep on the small farm. In the 15 years Manitoba increased its swine per farm from 4.32 to 5.71; Saskatchewan from 3.61 to 5.97; and Alberta from 3.92 to 5.09.

Demand For Farms

Sale Of Five Farms Is Reported By Development Company

Indicating an increasing demand for prairie lands by incoming settlers the Canada Colonization Association, a subsidiary of the Department of Colonization and Development of the Canadian Pacific Railway, has just completed the sale of five farms aggregating 3,040 acres. Locations and prices follow: 480 acres at Osage, Sask., \$19,000; 320 acres at McCauley, Sask., \$12,000; 480 acres at Hawarden, Sask., \$25,000; 960 acres at Provost, Alberta, \$38,000.

Forest Tree Seeds

The Forest Service of Canada has four plants for the extraction of forest tree seeds from the cones or envelopes. These are located at Indian Head and Prince Albert, Saskatchewan; Vancouver, British Columbia; and Rocky Mountain House, Alberta. The output of these plants in the fiscal year 1926 was about 2,500 pounds of cleaned seed. A large proportion of the seed was shipped to Great Britain to be used by the Forestry Commission in its reforestation work.

A man's religion never dies so long as he uses the golden rule in measuring his actions.

Pleads For Unity

Needed Above Everything Else Says Sir Arthur Currie

Just as unity was necessary during the war so it was needed above everything else in times of peace, declared Sir Arthur Currie, former commander of the Canadian corps in France, at a dinner in Montreal of the Royal 22nd Regiment.

Canada, Sir Arthur continued, had three great lessons to teach the world. First, it was the only country of its size that had won political autonomy without a war or a revolution of any kind; the only country in the world that had not had to fight a battle for its independence. Second, it contained two great races with centuries of war behind them, who lived in peace and harmony and with the one ideal—to make Canada a happy and prosperous land for a happy and prosperous people. Third, it had lived for 100 years at peace with one of the greatest nations of the world.

The Dominion, he believed, should play a great part in the development of peace.

The Value Of Courtesy

Nothing Else As Good For Business Or Making Friends

Courtesy costs nothing; but it is the greatest selling proposition in the world.

Courtesy recalls the customer and invites a new one; discourtesy drives away those you have and keeps away others.

Wisdom is always courteous; discourtesy is the earmark of stupidity.

Discourtesy is no mark of superiority. The real aristocrat is the most courteous to those whom fate has placed in lower walks of life than those he treats, thus we have a paradox which is a great truth—a real democrat is the only real aristocrat.

We all like money, but there is not one of us that does not know there are things more precious than money.

One's self-respect is one of them. The discourteous man insults the self-respect of others and makes enemies of them while he is making a fool of himself.

What could exasperate a man more than hitting a pedestrian with his new car and getting the fender all bent?

Not Becoming Lost Art

Still Plenty Of Work To Keep Blacksmiths Busy

If the clink of the hammer under the chestnut tree ever disappears from the land, the primary cause will be the vanishing of the chestnut tree and not of the village smithy. The smith a mighty man still is no despised twenty-four million automobiles. Delegates representing 70,000 master horseshoers and blacksmiths recently held a convention in Jersey City.

In New York City alone there are 65,000 horses to keep hammer and anvil from becoming a lost art. On the farms in the census year 1920, there was 19,767,000 horses. This was a decline of only 65,000 from the census of 1910 but the decrease in value is given at \$300,000,000. A fall of 15 per cent. in value for the average farm horse would be explained by the automobile, which has displaced the higher grade animal that the farmer hitched up for driving into town, and the farmer's son for the social buggy ride.

Nevertheless, it is admitted by a spokesman for the master horseshoers that their survival is conditioned upon compromise. The village blacksmith has taken an automobile repairing as a sideline. It is not stated how this compares with the main occupation. The census figures suggest that it must bulk large. In 1910 there were 233,000 blacksmiths in the country. Ten years later there were 195,000. The decline in the number of woman blacksmiths was catastrophic. It fell from 31 to 4. By this time the village blacksmithness must be only a memory.—New York World.

Elk For British Columbia

The Department of the Interior at Ottawa has granted the application of the province of British Columbia for elk to be used in restocking areas between the Okanagan and Kettle Valleys. Twenty-five animals from the herd in Buffalo National Park at Waterville, Alberta, were shipped to Coonson, B.C., and released. The Waterville herd numbers approximately 400 animals.

In the Polytechnic Institute of Zurich, Switzerland, is a clock which does not need to be wound. Its running power is provided by a mechanism set in motion each time there is a change in temperature of two degrees.

Crate Feeding Of Poultry

Instructions As To Best Methods To Be Used

No poultry intended for eating should be marketed without being fed. The easiest way to do this is by crate feeding, and detailed instructions for making the crates are given in a bulletin on Preparing Poultry Produce for Market, available at the Publications Branch of the Department of Agriculture at Ottawa.

The grains most commonly used in crate feeding are corn, oats, barley and buckwheat, or some of their by-products, but whatever is used should be finely ground. Whole grain should never be given. Corn produces a yellow fat, therefore it is advisable to use it with caution where white skin is in demand. An excellent mixture consists of equal parts of corn, oats and buckwheat.

In crate feeding the use of sour milk is indispensable where high quality is an object. The birds are not only fond of feed mixed with milk, but can take more of it, and can stand heavy feeding for a longer time when it is used. The milk is mixed with the finely ground grain in about the proportion of three pounds of milk to two of grain. This makes a rather thin mash. The birds are fed all they will eat twice a day, and any food that is fed should be removed immediately so as to keep the appetite keen. It is customary to mix a mash feed ahead so that fermentation may begin before it is fed. Cockerels especially should be crate fed before marketing. It will also pay to fatten the pullets and hens the same way when they are sold for eating. Two weeks may be sufficient time to crate females, but cockerels may be fed for three or even four weeks to advantage.

A Lasting Friendship

Difference Of Opinion Does Not Affect Canada-U.S. Relations

It was a happy coincidence that took the Prince of Wales and Mr. Baldwin to America just after the failure at Geneva and brought about the meeting on the Peace Bridge with the Vice-President of the United States. It is a poor friendship between either nations or individuals that cannot tolerate any differences of opinion; rather is it the sign of true friendship when it can reconcile candor with partiality. Europe took a certain pleasure in the spectacle of England and the United States, arguing with each other at Geneva, but our differences are not like those that divide Europe, and if neighboring States in Europe managed their relations with anything like the success of Canada and the United States, there would be no problem of disarmament to solve.—London Saturday Review.

Not All Imagination

In Last Century Hans Andersen Wrote Of Atlantic Flight

Hans Andersen showed a remarkable prescience of the flight of the Atlantic. In one of his stories, "In Years to Come," written in the sixties of last century, the gifted writer of fairy tales has the following passage:

"The airship comes. It is crowded with passengers, for the journey is quicker than by sea. The submarine-electro-magnetic wire has already telegraphed the number of the passengers. Already Europe is in sight. It is the Irish Coast that lies beneath them; but the passengers sleep on; they do not wish to be waked until they are exactly over Europe."

Needed Scientific Name

"Doctor, if there is anything the matter with me, don't frighten me half to death by giving it a long scientific name. Just tell me what it is in plain English."

Well sir, to be frank you are lazy."

"Thank you, doctor. Now tell me the scientific name for it. I've got to report to the missus."

Canadian Ice Cream For Bermudas

As a latest development of the Canada-West Indies treaty, ice cream is now being shipped from Halifax to British Guiana in liquid form and re-frozen at its destination. On the other hand, ice cream shipped to Bermuda is shipped in blocks and kept solid throughout the journey.

"I see this medicine is good for man or beast."

"Yes," said the druggist.

"Gimme a bottle. I believe that is the right combination to help my husband."

Never bet on a sure thing—unless you can afford to lose.

Keep your promises and discharge your obligations.

Handsome Canadian Pacific Exhibits

(1) The Railway Building at the Toronto Exhibition. (2) A portion of the Canadian Pacific Exhibit. (3) Illustrated data indicating the growth of the C. P. R.

Throwing the spotlight on all its renowned activities, the Canadian Pacific Railway has again achieved success in its exhibit this year at the annual exhibition at Toronto. It is a busy spot for the visitor; for both the artist and the seeker after instruction and education finds in this display a wealth of beauty and learning. Running from the ceiling down to a depth of about four feet was a circular panorama of the Dominion stretching from the Atlantic to the Pacific Coast. This frieze was designed by James Crockett of Montreal and executed by four other Canadian artists. In lovely colorings it gave an actual picture of the country through which the journey is made. At the base of this panorama the famous all-steel miniature Trans-Canada made its run.

Spread out as on a stage was a large model of the St. Lawrence River with the Atlantic Express steamships and smaller vessels entering and leaving the docks. In the foreground were prosperous looking farms, and across the river the city of Quebec with its winding streets and the towering Chateau Frontenac formed an absorbing picture.

To link the East with the West there was produced a working model showing the Banff Springs Hotel in its fairy-like surroundings. Here were seen the Canadian Rockies and the Bow River Valley in holiday mood. This beautiful castle of comfort in the heart of the mountains promotes the urge to see more of the country we live in. Tiny automobiles tour the winding paths, trail riders start off with their pack horses for snow-capped peaks, and the Stony Indian with his squaw seated outside their tepee helped to make the setting realistic.

The company's latest achievement in hotel construction was displayed in a model of the Hotel Saskatchewan, Regina. Covered wagons in the foreground tell the story of man's advancement since the days when wagons were the only means of crossing the prairies.

Special prominence was given to the new Canadian Pacific hotel to be erected at Toronto, "The Royal York" which when completed will be the largest hotel building in the British Empire. Much interest is being displayed by the public in this new structure which will rise 28 stories

above the street level and will be located directly across from the new Union Station. Other exhibits showed models of the Algonquin, Place Viger and Vancouver Hotels.

The Lands of Enchantment and Mystery discovered on the World Cruises were grouped in one colorful setting, with the hint of a cruiser gliding through the waters. All these scenes were reproduced so as to give an illusioning perspective and lighted with such changing effects as the dawn of day, the sunny noon, the deepening dusk and darkness.

Indicating the immense growth of the Canadian Pacific Express was a dais on which was constructed a reproduction of the Company's present headquarters compared with a model of the original Express building in Winnipeg dated 1882.

In addition there was a wonderful collection of revolving transparencies in natural colors, also rows of these were placed waist high around the exhibit. Each transparency clearly told its individual story. In the center was a pillar around which are life-sized figures of natives of foreign countries in characteristic costumes.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VIII.—Continued

Mr. Wymuth who backed up his wife's petitions by hollow groans and exclamations of "Lord, save!" and "God, have mercy!" was called to the telephone just at the moment that she was warning up to the real business of her report.

"O Lord, send down Thy chastening fire to convict and convert!" "Amen! Hallelujah!" shouted the girls, knowing what was expected of them.

Helmi, who was kneeling just behind Mrs. Wymuth, caught a glimpse of keys in the pocket of her black saten apron. A sudden impulse prompting her, she cautiously abstracted the keys and crept quietly backward from the room. In the general excitement of the evening devotions she was not missed.

Helmi went at once to the retreat, found the key which fitted, and then to the desk. She had been trusted to sweep and dust this hallowed spot, and so knew that one sacred drawer was always kept locked. It yielded to the right key, disclosing a pile of letters. Helmi found three for herself and one for Minnie. She hurriedly replaced the others, shoved her own and Minnie's into the front of her dress, and made the perilous journey down the long hall. If she had only told Minnie to keep on praying, her heels seemed to suck at the linoleum, her knees cracked, the house seemed to scream with silence. Mr. Wymuth was still at the phone. She reached the door. They were still on their knees, Mrs. Wymuth keeping up her supplications to the throne of grace. Some of the girls were crying. Helmi was on her knees in a moment beside them, and into her grateful heart there came an honest sigh of thanksgiving. Mrs. Wymuth, hearing it, redoubled her efforts—she would get Helmi yet.

"Oh, Lord, give us souls for our

DRAGGING-DOWN PAINS RELIEVED

Woman Suffered Nearly a Year.
Lydia E. Pinkham's Vegetable
Compound Brought Her Health

Moose Jaw, Sask.—"I am going to try to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered very badly with dragging-down pains and inflammation, also pains in my right side into my hip and down my whole side into my leg. I had it nearly a year when I went to a doctor and he said I would have to have an operation. But my mother said to take Lydia E. Pinkham's Vegetable Compound and it saved her life years before. I took two bottles and I found I was better, so I kept on taking it and also used Lydia E. Pinkham's Sanative Wash. I have had two more children since then and am perfectly well. I used to have to lie down two or three times a day, and now I do all my housework without trouble. I always keep the Vegetable Compound in the house as I find a dose now and then helps me. I am willing for you to use this letter any way you see fit and I will answer letters. If I can help any other woman I'd be only too glad to try."—Mrs. ESTHER Houghton, 414 Morse Square, Moose Jaw, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for all women.

For sale by druggists everywhere. O

W. N. U. 1701

"Oh, you wicked, wicked girl, Helmi! You have killed the best man the sun ever shone on! He is bleeding to death, his life oozing away!" Her voice, which always had a rusty whine, now fairly creaked.

The glass in the door of the cabinet had given Mr. Wymuth a cut in the cheek, and the blood ran over his pale face. Helmi, wide eyed and rigid, stood as if rooted to the floor.

"Murder! murder! murder!" Mrs. Wymuth's voice was rumbling now like distant thunder. "Oh, speak to me, Mr. Wymuth." Even in her excitement she remembered that it would not do to call him by his first name before the girls—in life or in death, discipline must be preserved. "Speak, oh speak, pale lips!"

The pale lips spoke. Mr. Wymuth's thin veneer had been cracked by Helmi's blow. "Shut up, you fool, and get me something to wipe off the blood," he said.

"He raves," cried his wife dramatically. "Go, girls, go! When he wakes—if he ever does wake in this life—he must see no face but mine bending over him. Go!"

The girls drifted noiselessly up the stairs, deeply awed by what had happened. Helmi suddenly remembered the letters she had concealed, and ran upstairs to find Minnie, who had gone to bed early. When Helmi reached the dormitory she found herself the centre of an admiring throng. "Gosh, I'm glad you patted him!" cried one. "Helmi, isn't you the best girl," said another.

"Serves him right, the big bum," was Rose Lamb's contribution. "I wish I had your nerve, Helmi. He walloped me for fair last week, and I was afraid to hit back. But Gee! he hadn't a look in with our husky Helmi!"

Minnie had awakened with the noise and was sitting up in bed, very pale and frightened, when the girls swarmed into the room. Helmi put the letter in her hand.

The first flush of congratulations gave place to dismal forebodings. "Gee, Helmi, I'm glad it was you and not that walloper! I'm scared they'll half kill you." This was from Maude, a repeater who seldom spoke. "It's the Board I am scared of. There's a whole room full of them, and we get dressed the night they come—and they ask us questions about are we happy, and we say 'We are very happy here and will try and repay all the kindness you have shown us.'"

"That's not a Board," said a young girl who had been brought in because she and her stepmother could not agree. "Board is what you pay when you eat."

"Shut up, silly! Maude's right. Ah! she's been here twice? I guess she would know. I'm afraid they'll kill Helmi, maybe, or do something bad—expel her, maybe."

"That ain't the worst." Rose Lamb led the discussion now. "You can't get expelled from this place, I guess if any one could, it would have been me. This is a jail, really, only it's a jail where they're going to convert you or bust. It's best to get converted first thing. I've been converted lots of times; every time I run away I get converted all over again. Gee! I'm getting fed up with these Wymuths! Ain't this a swell time we're havin' tonight! I'm all for Helmi, she's as good as a show." Rose began to sing.

(To Be Continued)

Women Are Expert Pilots

Bring Shipping Through Dangerous Waters Around English Coast

It is not generally known that there are more than 100 women pilots among the 4,000 expert navigators who bring shipping through the dangerous waters that abound round the coasts of England. One of these, Mrs. Martha Jones of Holyhead, came recently into the public eye through her part in a drowning accident on the Welsh coast. She goes out in all weathers to pilot cargo "tramps" and schooners into the smaller ports on a very dangerous part of the coast.

"How did the Smith wedding come off?" "The until the preacher asked the bride if she'd obey her husband." "What happened then?" "She replied, 'Do you think I'm crazy?' and the groom, who was in a sort of daze, replied, 'I do.'"

Noble birth is one thing and a nice, soft political berth is another.

Fall Colds

Attack them at the beginning. Heat and rubalo Minard's. Rub on throat and chest.

The better the quality of the tea you use the more important it is that the container should be the very best. By careful tests it has been proven that Aluminum is the best container yet found for tea—and Red Rose Tea is packed only in Aluminum—the finest package ever used for tea.

Design Flying Ambulances

Machines Intended For Use In Isolated Outposts Of British Empire

A fleet of flying ambulances that can be used as operating theatres of the sky have been designed by English air experts and are to be constructed for use in the R.A.F.

The machines, which are intended for use in isolated outposts of the Empire, such as Iraq and the North-west frontier of India, have accommodation for two stretcher cases, two attendants, and, if necessary, a surgeon.

The new flying ambulances will contain all surgical equipment which might be necessary in the event of it being decided to operate while a patient was being rushed to a base hospital at a speed of about two miles a minute. They will be fitted with two 450 h.p. Napier Lion engines, and it is intended that these shall be fitted with silencers as soon as an effective type has been evolved.

There will be on board a filter, to ensure a pure supply of water, tubes of oxygen, an ice chest, and a hand basin tank.

Large red crosses are painted on the sides and beneath the wings of all flying ambulances to prevent them from being attacked in time of war.

British Capital

Plenty Of British Money Always Available For Sound Canadian Enterprises

The North Mill, Newcastle, Eng., says that Canada was never more British in sentiment. Quite clearly her people, drawn so largely from our own midst, recognize the embarrassments of British finance today. They know that we dare not make chancy investments and they understand that prudence, and not faintheartedness dictates our present cautious and even critical attitude toward even the most alluring prospects put before us. Sound Canadian enterprises will never have British capital in vain. It is not in the interests of either Canada or Britain that rashly speculative ventures should be floated on British capital. It is probably true to say that British financiers are more alert to real opportunities within the Empire today than ever they have been in bygone days, but experience has taught us that temerity is advancing to no one.

Air Mail Service In Yukon

Former Two Weeks Trip Will Be Cut To Five Hours

The monoplane Queen of the Yukon, a sister ship of Col. Lindbergh's famous plane, arrived in Vancouver after a flight from Los Angeles which included numerous stops en route. The machine, piloted by A. Cruikshank, former Royal Air Force lieutenant and former member of the Royal Canadian Mounted Police, carried four passengers, including one woman and an infant.

The machine will be shipped North to be used in air mail and passenger service to link up White Horse, Mayo, Dawson and other Yukon points during the winter. The machine will be fitted with skis. At the present time it takes 12 to 14 days to carry mail between White Horse and Dawson during the winter and with the use of the plane this will be cut to five hours.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Pearls From Fish Scales

A New York company, one of the largest manufacturers of imitation pearl from fish scales, is erecting a plant at Nanaimo, B.C., to manufacture from the fish scales of the British Columbia catch, and production is set for November.

Dick—"If I asked you to marry me, dear, what would you say?" Joan—"Guess." Dick—"Well—or—what would it rhyme with?" Joan—"Guess."

It's a wonder that more men don't become round-shouldered from stooping to folly.

Man's "First Alphabet" Denounced As Fake

French Experts Find "Glozel Writings" Are Not Authentic

At a meeting in Paris of the Academy of Inscription the "Glozel Writings" discovered three years ago and believed to be man's "first alphabet" were denounced as fakes. The denunciation was made by Camille Julian, an authority on the Gallo-Roman era, and Rene Dussand, the academicien appointed to make a special investigation.

The famous writings, which were brought to light at Glozel, near Vichy, were declared by the finders to be the work of Neolithic man, thus presenting the contention that the writing originated hundreds of centuries before the period generally accepted by scientists.

For some time the authenticity of the inscription was not questioned. There was merely disagreement as to its age. MM. Julian and Dussand now declare they found many good reasons to suspect the "discoveries," citing as examples the objects had been recently disturbed, the lack of human bones, pictures of reindeer, which did not exist in France, and finally that a fee of four francs was being charged for admission to the property where the "find" was made.

Fares Change With Weather

Trans-Atlantic Passenger Rates To Be Lowered During Dull Season

Trans-Atlantic passenger fares in the future will change with the seasons.

Cheaper rates for steamship passage are to prevail during the fall and spring as well as winter. This action of steamship officials has been taken to stimulate business in what are known as the off-seasons.

By the new arrangement, agreed to by all the principal trans-Atlantic companies, there will be three different tariffs, one for summer when travel is at its height, one for the intermediate seasons, the late fall and early spring, and another for mid-winter when travel is lightest.

The reductions on the more luxurious liners, such as the Majestic, Berengaria and Leviathan, in some instances amount to ten to fifteen per cent. from the summer tariff.

Little Helps For This Week

The fruit of the Spirit is love, joy, —Galatians v. 22.

So take joy home, And make a place in thy great heart for her, And give her time to grow, and cherish her. Then will she come, and oft will say to thee: When thou art working in the furrows,—ay, Or weeding in the sacred hour of dawn, It is a comely fashion to be glad, Joy is the grace we say to God. —Jean Ingelow.

All God-like things are joyous, they have touched God, and so they carry with them an irresistible gladness everywhere.—Frederick W. Faber.

Angora Rabbit Farms

Reports state that Angora rabbit farming is being carried on to a very large extent by the people of France. Many thousands of Angora rabbit farms are in operation throughout the country and these depend largely on the revenue from the wool taken from the Angora rabbit which brings as much as \$8 a pound for the best grade. In one year, Angora rabbit wool produced in France amounted to \$190,000.

Educating Indian Citizens

The expenditure by the Government of Canada on Indian education in the fiscal year 1926 was \$1,918,000. In addition to this certain bands of Indians, whose funds were sufficient to meet the expenditure, contributed \$67,000 for school purposes.

The tourists were being shown the Acropolis at Athens, when one of them, after an enthusiastic "Gee, I'll say it's great!" appeared to miss something.

"Say," she said, "where are the four horsemen, anyway?"

When love sets the task the laborer never thinks of demanding shorter hours.

Fresh Youthful Skin Maintained by Cuticura

Daily use of Cuticura Soap, with touches of Cuticura Ointment when required, will do much to prevent pore-clogging, irritating rashes, roughness and other unwholesome conditions of the skin.

Sample Each Free by Mail. Address Canadian Agents: "Stratford, Ltd., Montreal." Price, Soap 25c. Ointment 75c and 10c. Cuticura Shaving Stick 25c.

Prevent Grippe—build resistance with SCOTT'S EMULSION

SPEARMINT has a tang and zest to brighten your whole day! It keeps teeth white, soothes the throat, and aids digestion.

Local Possibilities

Home Neighborhood Usually Offers Better Chances Than Elsewhere

Many folks will start off to some far distant city or state to seek their fortunes when there are equally good or better chances in the home neighborhood. The chance to make good in one's home location is usually better, since people understand local conditions more thoroughly. They also have friends in their home locality who will be of assistance in developing any kind of business. There are opportunities for business everywhere and they are just as good as elsewhere. The people who render superior service and who advertise what they can do will always attract attention and go ahead.

THIN, WATERY BLOOD ALWAYS DANGEROUS

If Not Corrected Serious Results Sure To Follow

In no trouble is delay or neglect more dangerous than in anaemia—thin, watery blood. It is very common in young girls, and in persons who are overworked or confined within doors. It makes its approach in so stealthy a manner that it is often well developed before the trouble is recognized. But taken in time the tonic treatment through the use of Dr. Williams' Pink Pills, so enriches the blood that good health and strength is speedily regained. The correction of anaemic conditions by Dr. Williams' Pink Pills is as certain as anything can be. Miss Teresa Heafey, Dunroven, Que., is one of the many anaemic sufferers who has found new health through the use of this medicine. She says:—"I cannot express too warmly my thanks for what Dr. Williams' Pink Pills have done for me. I was suffering from a badly run-down condition. I was very nervous, had little desire for food, and would feel tired out at the least exertion. In this condition I began taking Dr. Williams' Pink Pills, and before using them very long found my health gradually improving, and under their continued use was completely restored. For this reason I earnestly advise all weak girls to take these pills, feeling sure that they will do for others what they did for me."

Send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., and they will mail you free a useful little book on "Building Up the Blood." The pills can be obtained through any druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Perhaps the only way to get around the problem of what is the plural of "gallidius" is to grow asters.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

The average man thinks he isn't even with the world until he owes others as much as they owe him.

Minard's Liniment for Toothache.

So often one reads a best seller and is saddened to think there are so many people capable of liking it.

Warn the Children

Cardston has had one fatality in the death of the little Jensen girl some months ago which is going to be repeated one of those days, if the children of this town do not take a different attitude toward car traffic. Without inferring any conclusions whatsoever in the other accident, which was a terrible thing from either point of view, the fact remains that too many children in Cardston take mighty long chances with their lives while playing on the street. It is not uncommon for drivers to be heckled by youngsters as they pass, and for these children to actually go farther in their heckling, and run across the road or even stand directly in front of passing cars. There are a number of drivers who recently have complained of this defiant attitude on the part of youngsters is altogether too widespread here for one meets it in almost every section of the town.

The purpose in stating these conditions is to draw the attention of parents and children to the responsibility which children have in such unfortunate accidents as sometimes happen. Children should be warned, for it easily could be that the next driver's brakes were not so good and the car would not stop in time. Then there will be a sad accident, if not a death, and a coroner's jury, and all the rest of the sad details of such things. Surely there are reasons on the side of good manners and courtesy to train children differently, aside from the evident need of observing the "safety-first" principles. — Cardston News

Program Sunshine Trail for 1928

The highway from Cardston to Waterton by way of Mountain View will be completed to dirt standard equivalent to the Lethbridge Chin road this year, N. H. Brady, district road engineer states.

It is expected that the graveling will be done in plenty of time for next year's tourist traffic to Waterton Park.

The road from Cardston to Macleod, by way of Standoff will also be finished this year. The contract allows until October 29th for the completion of this connection link between the Glacier-Babb and Macleod-Edmonton highway.

Work is proceeding now on the graveling of the Nanton-Macleod road and it is probable that the new Macleod-Cardston route will be graveled next year, making a fine graveled road from Glacier to Edmonton.

Some maintenance work is being done on the Pincher Creek-Waterton Lakes highway but no extensive program is being carried on.

The work on the dirt standard highway from Lethbridge to Chin will be completed this week, according to Mr. Bradley.

If the Sunshine trail from New Dayton to Lethbridge is graveled next year it will not be finished until late in the fall. No more graveling will be done until the stretch from Lethbridge to Stirling is brought up to dirt standard road and this will be done as part of the 1928 program.

Have your individual stationery neatly printed. Special offer: 250 letterheads and 250 envelopes \$5.00.—The Raymond Recorder.

Knight Sells 17,000 Purebred Sheep

Confidence in the future of the sheep industry is shown by C. Raby, buyer and livestock dealer, who just consummated a deal with the Knight Sugar company here, for the purchase of 17,000 sheep.

The deal involves the huge sum of approximately \$140,000 for the flock of fine quality Ramboulettes, consisting of lambs, yearlings, two, three and four year old sheep.

James H. Walker, representing the Knight Sugar company, just returned from Brooks where he turned over four carloads of the first consignment.

The buyer is optimistic regarding the future in the sheep industry and states that he intends disposing of the greater portion of his purchase. Shipments will be made by Mr. Raby to Cardston, Magrath, Coutts and many other points. Several shipments will also be made to points in British Columbia.

The next shipment to be turned over to the purchaser will be made from the Kirkcaldy ranch, south of Raymond. Weather permitting the livestock will be loaded and billed out next Saturday.

Mr. Walker stated that his company had disposed only of parts of the herd, this will make room for the increase. — Lethbridge Herald

Arthur Mc Mullin left for Calgary last Saturday where he will begin the study of Electrical Engineering.

The last of the unused model T Fords left King Motors last Friday when a coupe went to Andy Cannon of Taber, and a sedan was taken by Sam Nelson of Stirling.

I'll tell you why I'm going to
buy a Westinghouse

"We've had a terrible time deciding which radio set to buy—every maker claims to have the best.

"Yesterday morning Jack said, 'Well what about our electric range and appliances? They're made by Westinghouse and they are certainly alright—never give a moment's worry.

"So we saw a Westinghouse when we went up town last night and as soon as I heard it I knew Jack was right.

"The Westinghouse dealer gave us a perfectly wonderful demonstration—we ordered it there and then and it's to be installed tomorrow."

We will gladly demonstrate the 1928 Westinghouse models and explain the many improvements that make them better.

Fifty Gallons of Gas FREE!

Here's the Idea: To the person who guesses nearest to
The price of a new Ford Coupe

F. O. B. Raymond

we will give 50 gallons of gas FREE

It doesn't cost you a cent to make a guess. Simply fill out the form below and hand or mail it to King Motors. No guess will be received after the official price announcement, now expected daily. Hand in your guess today! The model T coupe sold at \$745 f.o.b. Raymond.

Will the new coupe be higher or lower in price? Make your guess. In case of a tie the gas will be divided. One guess only to each family. Members of the firm, staff or their families may not compete.

Date 1927

King Motors:—I guess that the price of the new Ford Coupe, f. o. b. Raymond, will be \$

I now drive a car. Model Year
(Give model and make of your car, if you own one, to make your guess count.)

My name is Address

King Motors : L. D King

Watch for the big Bubble Balloon Dance to be given on Thanksgiving Day, Nov. 7 in the Opera House.

FOR SALE—No. 1 6-inch Shiplap \$30 per thousand. Suitable for graineries. Call at new sections house at the C. P. R. depot.

Born—To Mr. and Mrs. Geo. Kirby, a son. He will be known as Reg.

Dr. G. D. Leach, prominent physician of Lethbridge, has engaged offices in the Security Block, and will move to Raymond. It is likely that he will be engaged as local health officer.

A special harvest ball will be held in the Opera House Saturday, October 22, with the Premier orchestra in attendance. Special decorations and novelties will be featured. Couple \$1.00. Extra ladies' 25c.

News Notes

Thresh the grain
'Cause it may rain.—Lengfellow.

Una Thompson, the slugging Bambino of the Cardston baseball squad, has accepted a position as mechanic at King Motors, while George Romeril has gone a-threshing.

Willard Keith, Cardston real estate man, and Mr. Hackett, of Lethbridge, passed through town Wednesday evening enroute to Lethbridge.

Ora Duce, basketball star of the Cardston team last season, has accepted a position at the sugar factory in company with Bill Jones, son of C. P. R. conductor Sam.

Wednesday and Thursday, next week, the Mid-Western Screen Service will produce a local motion picture on the stage of the Rex theatre. A regular feature picture will be taken, using a local cast and local scenes. Each night a scene will be taken on the stage, showing how movies are produced in the studios, and after the scenes are taken the camera will be turned on the audience and everyone in the house will have a chance to see himself in the movies. During the day scenes will be taken on the streets. The pictures taken these two days will be shown at the Rex theatre later. Don't forget, see yourself in the movies next Wednesday and Thursday at the Rex.

Writing in The Farm & Ranch Review, C. W. Peterson says: It seems obvious to me that an organization which controls the wheat production of 135,000 farmers, fifty per cent of all Canada's wheat and twenty-five per cent of the world's exportable surplus, and which is organized to render services to its membership at actual cost, can effect such economies in handling, and has such tremendous power, that to place it side by side with the comparatively puny efforts of even the greatest of private grain handling concerns is fantastic in the extreme.

Buying On The Installment Plan

PURCHASING commodities by paying "a dollar down and a dollar a week" has grown into great popularity. Often the object purchased is worn out before it is paid for, and the purchaser continues to pay. Buy yourself a fortune on the installment plan by placing regular installments of your earnings in a Standard Bank savings account. The money is always available for use if required and there is no depreciation, but accruing interest as time goes on.

Local Theatre Man To Screen Plot With Local Talent

Leo Brewerton, operating the Rex theatre, has contracted for something extremely novel in the way of entertainment, the filming and showing of a scenario, made in Raymond and acted by local talent. When the film is completed will be shown to the audiences in the city.

WATCH THE MAKING

A scenario will be made on the stage of the Rex theatre, which will be prepared for the purpose with the latest equipment—Klieg lights and all. A cast of local talent will be chosen to enact the parts in the scenario. It will be a wonderful opportunity for budding Mary Pickfords and Douglas Fairbanks. The idea, mainly is to give the people an opportunity to see how films are made. The audience will be back in comfortable chairs and watch the actors performing in front of the camera, and being local characters, it should make an interesting performance. About three weeks after the play has been filmed, it will be brought to Raymond and screened. As an added attraction between acts, the camera and light will be turned and the audience filmed, these shots to be shown in conjunction with the main pictures when they are brought back to the city. Everyone has a desire to see himself or herself as others see them so this gives an opportunity for which they have no doubt longed. There is also a likelihood that a juvenile scenario will be filmed.

When Dick Scott, prominent Liberal, heard that the formidable R. B. Bennett had been elected to the Conservative leadership he grew so excited that he forgot all about his game leg and has since walked without the aid of his cane.

DANCE—Opera House, tomorrow, Saturday, given by the Stake Primary. Music by the Premier Orchestra. Gentlemen \$1.00, Ladies free. A free dance for children will be held at 3.30. Ice cream and pop corn for sale. A Junior dance will be held at 6.30. Admission 15 cents.

NOTICE—Those desiring the services of the Premier Dance Orchestra, should engage them at least one week ahead of the date required, to avoid possible disappointment. Several dates have already been booked for the season.

Will receive pupils commencing October 17. All past pupils under my teaching, taking Toronto Conservatory examinations have been successful.

PRICES—Beginners 50c, and all others 75c per lesson. Please call at the home two doors east of the High School.

Factory Employees Get \$800 Per Day

On Wednesday at 12 o'clock midnight the first load of beets were run into the chopper, and the mammoth mechanism at the factory began its third annual sugar-making campaign with 2500 tons of beets in the shed. The run will last about 60 days.

Beets are being delivered to the factory at the rate of about 900 tons a day. Figures as to average yields are not yet available, but indications point to heavier crops than last year, and an increase in sugar content.

Employees numbering 200 about 35 of whom are girls, due to shortage of male labor, are required for the three shifts. Their salaries aggregate more than \$800 per day.

The last bag of last year's sugar left the warehouse two weeks ago, and this huge building is now ready to receive its new supply.

The company's market at present extends only throughout this province, as the aim is to widen the sale of pure Alberta sugar no faster than can be supplied the year round.

News Notes

John O'Brien was in a Salt Lake hospital for a couple of days with minor injuries, and Harvard Shepard, brother of Mrs Glenn Tolles-trup, was unconscious for two days in the same hospital, as a result of an auto accident a few days ago. Other occupants of the car. Dick O'Brien and Jesse Knight, son of Ray Knight, escaped uninjured. The O'Brien boys it will be remembered left here with their mother to attend school.

The weekly social of the First Ward Gleaner Club was held at the home of Virginia Holmes on Wednesday, October the twelfth. Eighteen girls were present. A very instructive talk given by Lura Redd on the artist, Whistler, made the evening very profitable as well as entertaining. Dainty refreshments were served, after which the girls dispersed until the following week agreeing that they had spent their time very pleasantly.
